To the Honourable Ray Lawson, O.B.E., LL.D., D.Cn.L., D.C.L.,
Lieutenant-Governor of the Province of Ontario.

Your Honour,

I beg leave to present to your Honour the Report of the
Department of Education for the year 1950.

Respectfully submitted,
DANA PORTER,
Minister of Education.

Toronto, October 1, 1951.

PART I

GENERAL

THE
GENERAL

Report of the Minister of Education

1950

The data contained in the pages of this report throw some light on the present state of education in Ontario. The full significance of educational statistics sometimes becomes apparent only if the information presented is compared with similar figures for other systems or for other periods. For example, the expansion and improvement which have taken place in a period of one hundred years can be seen if the facts and figures in this volume are compared with some of the details and opinions contained in Egerton Ryerson's report as Chief Superintendent of Education for the year 1850. In the main such a comparison yields contrasts and differences, but occasionally we find striking parallels and the expression of views which we can hardly believe to be separated from our own by the passage of a century of educational history.

Ryerson reported that in 1850 there were in existence 3,407 school sections, with schools in 3,057 of them. He deplored the tendency to increase the number of sections and to reduce them to too narrow limits by frequent changes in their boundaries. The modern reflection of this view is to be found in the recent rapid development of township school areas. There are now 536 of these larger school units which have been formed out of 3,469 school sections, a few more than were in existence a hundred years ago. Ryerson's attitude is also significant in connection with the organization of high school districts, which is now practically complete for the province.

The age of compulsory school attendance in Ontario was raised to sixteen years by the Adolescent School Attendance Act, passed in 1919. Ryerson was in 1850 reporting the number of children between the ages of 5 and 16 as if he recognized that this represented the proper age span for school attendance. The total he gave was 259,258, but he was forced to admit that only 151,891 were in attendance, and that after all allowances were made for enrolments in private schools and grammar schools there were 100,000 children not attending any school. The school enrolment is now practically identical with the population of school age. The number is in

excess of 700,000, and the day-to-day attendance is close to 95% of the enrolment. The attendance acts are properly enforced, and public opinion recognizes their validity.

The School Act of 1850 permitted each school section to determine the method to be employed in supporting its school — whether by voluntary subscription, by rate-bill or by assessment on property. By all these methods and by allotment from the legislative grant the total amount available for teachers' salaries is given by Ryerson as £88,478. In 1950 the legislative grants for all educational purposes were in excess of \$42,000,000.

The other large item in the cost of education mentioned in the 1850 report is £14,189 spent locally on the erection and repair of school houses. The government's contribution seems to have been the distribution of 400 copies of "a comprehensive and excellent work on School Architecture." The return shows that there were 2,975 common school houses in Upper Canada; 99 of brick; 117 stone; 1,191 frame and 1,568 log. Of these 1,036 were in bad repair; only 98 had more than one room; 996 had no facilities for ventilation; 978 had no playgrounds; 1,215 had no privies. A happier note was struck in recording that 271 schools were erected during the year, and these, "in construction and conveniences," were "generally a great improvement on the old ones."

To point the contrast, the construction programme for 1950 saw the completion of 228 new schools or additions which provided accommodation for 36,000 pupils. The estimated cost was \$31,000,000. It can safely be said that these buildings also represent a great improvement on the old ones, but it cannot yet be said that the physical requirements of the school system have been completely met. It must be assumed that for the next ten years the school enrolment is likely to increase at the rate of 25,000 annually. Shortages of materials and rising costs of construction and equipment are likely to be encountered in any attempt to meet this continuing need.

The system of allotment of the legislative grants was reorganized in 1950. Since so many municipalities are faced with large capital expenditures or debenture charges incurred in connection with their school building or renovation programmes it was considered fair to make such expenditure one of the main bases of grant allotment. At the same time a larger proportionate grant was provided for poorer municipalities by fixing a differential table of percentages varying between 16 and 90 per cent, based on population and assessment, to be used in determining the rate of repayment of approved expenditures.

There was a shortage of trained teachers in 1850. Out of 3,476 teachers employed, 291 had attended the Normal School, or in other words about 8 per cent had had some professional training. The Normal School had only been open for three years. In 1950-51 there were some 25,000 teachers employed in the schools of the provincial systems. Approximately 2,200 new teachers were taking courses in the training schools, and yet it was necessary to permit, as for some years past, about 450 persons to teach without professional training.

It is of passing interest to note the reversal of the proportions of men and women teachers. In 1850 there were 2,697 males and 779 females, or rather better than three to one. The proportions in the Normal Schools and in service in the elementary schools today are just the reverse, one to three or four. In the secondary schools men are still in the majority.

For many years the elementary school grades in Ontario were named after the divisions of the four readers, from junior first to senior fourth. Ryerson admitted that one of the advantages of the adoption of the Irish National Readers was that it facilitated the classification of pupils. He added that, in 1850, these recommended books were gradually superseding all others. It is interesting to note that in 1950 we have reverted to the use

of recommended books after many years of rigidly authorized readers and other texts whose exclusive use provided uniformity but not variety. Recommended lists of books now permit the teacher considerable latitude of choice. Ryerson's remark about the use of the readers to classify pupils is also interesting in the light of modern developments. The substitution of primary, junior and intermediate divisions for the older classification is a deliberate attempt to free the school system from the shackles of the one-grade, one-book, one-year organization. Experiments with the new organization are in progress in many centres throughout the province. The freedom it permits should help to solve some of the problems of retardation of pupils held back because of weakness in one subject or another. A free organization should permit progress in each subject at a rate suitable to the capacity of the individual, and the provision of subject matter related to his interests and needs.

Where formerly uniformity was thought desirable and a detailed curriculum was imposed by the central authority, local authorities are now being encouraged to prepare their own courses. Experiments are being carried on in the development of new curricula with particular reference to local needs and interests. Special attention is being given in these experiments to the needs of the considerable number of pupils who will leave school as soon as they have passed beyond the age of compulsory attendance.

This, therefore, is a period of growth and expansion of the school system supported by generous legislative grants, a period of experimental seeking for better educational materials and methods by the enlistment of local interest and enthusiasm, and so a time of progress and healthy development in the history of education in Ontario.

Elementary Education

LEGISLATIVE GRANTS

During the year some alterations have been made in the grant plan. The grant is the sum of

- (a) \$16.00 for each pupil of average daily attendance during 1949;
- (b) a percentage of expenditures during 1949 for
 - (i) instructional salaries up to an amount for such salaries of \$75.00 for each pupil of average daily attendance,
 - (ii) debenture charges for new buildings or additions, and for transportation up to the amount approved in each case, and
 - (iii) approved capital outlays from current funds except that, in the case of a board in an urban municipality with a population of 2,500 or more and a board in a rural municipality with a population of 20,000 or more, the amount eligible for grant is not more than would have been eligible under Regulations 64/49,
- (c) in the case of larger units of administration, \$300.00 for each former school section included in the larger unit.

The total amount paid to elementary boards in 1950 was \$27,799,518.00, an increase of \$3,697,512.00 over the figure for the previous year.

ADMINISTRATIVE UNITS

In recent years there has been a definite trend in the province toward a reduction in the number of administrative units for the elementary schools. Under existing legislation, councils of the municipalities concerned are permitted, by means of by-laws, to combine two or more school sections to form township school areas administered by school boards of five members. A township school area may include part or all of one or more townships, and a town or village adjacent to the rural portion of the area may be included. The by-laws to become effective must be approved by the Minister of Education. Before 1950, 514 township school areas had been formed. In 1950, 142 school sections were dissolved to form 22 new township school areas and to make additions to 10 existing areas. The formation of the 536 areas in existence at the end of 1950 has involved the dissolution of 3,469 former school sections.¹

A similar trend is noticeable in the administration of separate schools. In 1950 six new union boards were formed to administer separate schools formerly under the direction of fifteen authorities.²

TEMPORARY CLOSINGS

The closing of one-room schools with low enrolment has been encouraged in the interests of economy, efficiency, and the social development of the child by association with other children of his own age. As the result of voluntary action by the school boards concerned, thirty-nine small schools were closed in 1950. Twenty-six of these schools were in township school areas.³

¹ For tables see p. 90

² For tables see p. 95

³ For tables see p. 95

TRANSPORTATION OF PUPILS

The Department, during 1950, has continued its policy of assisting school boards to finance the transportation of pupils to elementary and secondary schools. The need for transportation of pupils has been created largely by increased enrolment in some schools, decreased enrolment in other schools, and the trend toward larger schools. Improved roads have facilitated transportation arrangements.

In 1950, 660 contracts for the transportation of 18,117 pupils to elementary schools were approved for legislative grant purposes. These did not include agreements for transportation necessitated by closing small schools, a type of contract which is approved by the elementary school inspector without reference to the Department.

As the organization of larger high school districts continues, the boards of most of these high school districts are assuming responsibility for the transportation of secondary school pupils.⁴ During 1950, however, public and separate school boards received approval for legislative grant purposes for 614 contracts covering the transportation of 6,447 pupils to secondary schools. The number of rural pupils attending secondary schools continues to increase with the improvement of transportation arrangements.

THE SUPPLY OF TEACHERS

During the school year September, 1950, to June, 1951, it was necessary to grant letters of permission for boards to engage 424 persons who did not possess complete professional qualifications for elementary schools in the province, but who had completed, at some time, a teacher-training course.

During the same period of time it was necessary to issue 443 letters of permission to boards to engage persons without teacher-training experience. Both these numbers are lower than those for the previous school year.⁵

CORRESPONDENCE COURSES

In 1950 it became possible to extend the opportunities of education through correspondence courses to a wider constituency and in a broader field of subjects and grades. The courses may now be received by anyone unable to attend school, and by anyone attending school if he has the recommendation of the local elementary school inspector or high school principal and wishes to take subjects not provided in the school. The total enrolment in correspondence courses in December, 1950, was 1,446. This total included 945 taking ordinary elementary school courses, 202 in elementary bilingual courses, and 198 Grade IX and X courses.⁶

This enrolment showed a slight decrease in those taking elementary courses, which may have been due to the improvement of transportation facilities provided by school boards with the aid of the Department of Education. On the other hand, there was an increase in the enrolment in Grades IX and X. Adult courses and Grades XI and XII were begun this year.

In addition, a special service was given as usual to missionaries from Ontario (39 families at points in the Arctic, South America, British West Indies, Africa, China and Japan), to persons teaching on letters of permission, and to teachers and inmates of institutions such as hospitals, reform schools and penitentiaries.

The courses are free, but students taking the courses for adults and those in secondary grades are required to purchase their own books. Thirty

⁴ For tables see p. 143

⁵ For tables see p. 204

⁶ For tables see p. 204

teachers in schools throughout the province were engaged in revising courses for the first six elementary grades, in writing new ones for seventeen secondary academic and three vocational subjects, and in preparing special elementary courses for adults. Through the courtesy of the Department of Education of the Province of Alberta, the courses for Grades I-III were adaptations of correspondence courses prepared by that province. The generosity of the Alberta Department of Education in this connection is gratefully acknowledged. In addition, work was begun on four Trade Courses being prepared in collaboration with the Federal Government and Correspondence Course Branches in other provinces.

A staff of thirty-six, twenty-eight of whom were teachers, did the teaching and clerical work for both new and old courses, and at the end of the year three teachers were appointed to mark work in Grades XI and XII on a part-time basis.

The library, newly formed in 1949 for Grade VIII only, although still small, was expanded to provide also for physically incapacitated children in Grades IV, V, VI and VII and students studying English Literature and Composition in Grades IX, X, XI and XII.

RAILWAY SCHOOL CARS

In order to provide education for children living in sparsely settled areas along the lines of the northern railways, two school cars were put in operation in 1926. To-day there are six such cars, three on the C.N.R., two on the C.P.R., and one on the O.N.R. Each car operates on a circuit of approximately 140 miles and makes from six to eight circuits a year. The number of stops varies from three to five, with an average enrolment of six at each stop. The teachers are chosen for their adaptability to pioneer life. They have been of great assistance to parents and children, some of whom have been new Canadians, not familiar with our way of life. In many cases the school car has been a centre of community life.

SCHOOL HEALTH SERVICES

Most school health services continue to be administered under the Ontario Department of Health as part of a general community health programme. This practice necessarily requires co-operation between the two departments of government and their officers in the field. This co-operation has been facilitated by consultation among the departmental officials concerned. There is co-operative effort also, consistent with economy of construction, to provide necessary accommodations for the school nursing staff in new and in renovated school buildings. Moreover, inspectors are expected to promote co-operation in school health work by the school boards and teachers with the local medical and nursing staffs.

NEW CONSTRUCTION

In 1945, an elementary school building programme was initiated to meet the accelerated growth in school population. The number of elementary school pupils will probably continue to increase until 1960. So far, construction has kept pace with the requirements and has included 424 new schools, 368 additions, and 17 temporary buildings. Accommodation has been provided for 91,000 pupils. In 1950, 27,000 pupil-places were provided. Although in general construction has kept pace with demands, in certain suburban areas the growth has been particularly rapid, and it has been difficult to provide sufficient school accommodation.⁷

⁷ See also p. 12

Administrative duties requiring the attention of school inspectors have continued to be met by them with willingness and efficiency. Among such duties looming large in the inspectors' work are those concerned with new school construction, transportation of pupils, and reports relating to legislative grants. It is also the duty of inspectors to facilitate in an administrative and professional way the work of special subject supervisors and agencies, such as agriculture, art, audio-visual aids, auxiliary education, home economics, industrial arts, music, school attendance, and travelling exhibits of the Royal Ontario Museum. The services of our field inspectors have been freely given in the work of curriculum co-ordinating committees, and they have interested themselves in those schools and classes doing experimental work on curriculum. Many of them have served on the staffs of summer schools. Extra duties have also devolved on inspectors in regard to selection of and help for emergency teachers, and in their responsibilities because of discontinuance of the High School Entrance examination. All these special services are much appreciated. Group conferences of inspectors and Normal School staffs, attended also by Departmental officials, have been held periodically. These have been valuable in clarifying professional and administrative problems. Appointments of new and assistant inspectors have lightened somewhat inspectors' administrative duties through reduction in the size of certain inspectorates.

Secondary Education

1. COLLEGIATE INSTITUTES, HIGH SCHOOLS AND CONTINUATION SCHOOLS

HIGH SCHOOL DISTRICTS

The guiding principle in a policy of trying to meet more fully the needs of pupils in the secondary schools has been to provide an attractive variety of courses, adequate accommodations, and convenient means of transportation on as wide a scale as possible. Enlargement of school districts is one means to this end. In June, 1950, twenty-nine additional high school districts were formed to come into operation January 1, 1951. As three of these were formed by dividing existing districts and one by joining two districts, the actual increase in the number of districts was twenty-five. By the end of the year the greater part of the province had been organized into high school districts. Only four counties (Prince Edward, Dundas, Leeds and Grenville) lacked district organization entirely, but plans were being considered to organize portions of these. The average district contained nineteen elementary school sections.

Transportation approvals for 1950-51 increased greatly. High school boards operated 1,092 routes and carried 27,847 pupils 49,281 miles per day at a daily cost of approximately \$13,000.⁸

ENROLMENT

The total enrolment of pupils in the collegiate institutes, high schools and continuation schools of Ontario for the school year 1949-50 was 97,160. The number of full-time teachers in these schools was 4,323. The corresponding numbers for 1948-49 were 95,272 pupils and 4,101 teachers.

⁸ For tables see p. 143

BUILDING PROGRAMME

During 1950 the programme of secondary school construction was continued and extended. In 1949 eighteen secondary school projects (new buildings, additions and alterations) were completed at an estimated cost of \$7,266,000. In 1950 twenty-nine such projects were completed at an estimated cost of \$13,018,000.

New secondary schools were completed at Chesley, Cornwall (Suburban), Gravenhurst, Huntsville, Oshawa, Ottawa (Fisher Park), Parry Sound, Ripley, Tillsonburg and Wallaceburg. These attractive and well-designed buildings provide accommodations for 4,530 additional pupils at an estimated cost of \$5,703,000. The additions and alterations, at an estimated cost of \$7,315,000, accommodate 4,320 pupils. The building plans for 1951 indicate that there will be a substantial increase over the programme for 1950.⁹

CURRICULUM

(a) The announcement of the combination of Grades VII, VIII, IX and X into one unit for curriculum purposes, to be called the Intermediate Division, has already had far-reaching effects in the schools throughout the province. Elementary and secondary school teachers have welcomed enthusiastically the opportunity to work together in discussing and planning new courses of study. Work on the revision of the curriculum has absorbed much of the time of administrators, supervisors and teachers.

Co-ordinating committees, locally organized under the authority of the Department of Education, have been set up to consider the curriculum requirements of their own areas. These committees have appointed subcommittees whose duty it is to draw up courses of study in the various subjects. These courses, recommended by the co-ordinating committees, may be approved by the local boards for adoption. Much of this work is still to be completed, but enough has been done to indicate that teachers have been keen to take advantage of the opportunity to introduce new ideas and to adapt subject matter to local conditions. In addition, committees of elementary and secondary school inspectors were appointed by the Department of Education to draw up general suggestive outlines of courses of study in the various subjects for experimental use.

(b) Summer workshops in curriculum building were held at Kingston and Port Arthur. Other groups met at Fergus and Dorset to work on problems related to the social studies and conservation, respectively.

(c) In Curriculum Memorandum I, issued in December, 1949, the announcement was made that steps would be taken to distribute more equitably the weight of the prescribed work over Grades XI, XII and XIII (the Senior Division). As a preliminary step experimental courses in Grades XI and XII were established for the school year 1950-51. Three schools were selected for each subject and asked to try out revised courses of study in these grades. The information gained from these experiments is expected to be helpful in making adjustments in the courses of study of the Senior Division.

SPECIAL FORMS OF INSPECTION

Another group of composite secondary schools was selected in 1950 for joint inspection by inspectors of both the High School and Vocational School branches. These were the secondary schools at Cornwall, Galt, Kirkland Lake and Peterborough. The inspectors again directed their attention

⁹ See also p. 10

chiefly to matters of organization, accommodations, promotion standards, optional subjects, guidance, and the relation of the school to the community. Although there was less opportunity for visiting the classrooms, the work of new teachers was carefully observed.

In September, 1950, another type of inspection was inaugurated on an experimental basis for a selected group of high schools with staffs of not fewer than five teachers. In view of the growth of inspectors' duties arising from the increased number of high school districts, it was proposed that inspectors might give certain schools an inspection which, for one year, would not lay as much emphasis as usual on classroom visiting. There would be more opportunity to pay attention to the work of local curriculum committees in order that the inspectors might be able to keep abreast of the latest developments. In addition a considerable part of the inspector's time might be spent with the principal, heads of departments and members of the staff in discussion of such matters as administration, organization, optional subjects and local educational problems.

Early reports on this type of inspection indicated that both principals and teachers were keen to discuss their problems with the inspector and that much was to be gained from round-table discussions by small groups.

SECONDARY SCHOOL GRADUATION DIPLOMA

The announcement was made in September, 1950, that Departmental certificates of Middle School standing would be discontinued. This change in the regulations places upon the principal the responsibility for (a) checking and recording carefully the standing of each pupil at the end of Grade XI and (b) reporting accurately the standing at the end of Grade XII of each pupil who is eligible for the Secondary School Graduation Diploma. Marks and proficiency standing will no longer be reported to the Department.

2. VOCATIONAL SCHOOLS

GRANTS AND COSTS

Legislative grants to vocational schools in the fiscal year 1949-50 amounted to \$4,500,169¹⁰ and the net municipal expenditure for these schools was in excess of six million dollars. Building and equipment costs continued to increase along with operating costs.

Under the Vocational Schools Assistance Agreement the government of Canada pays a grant equal to provincial expenditures in grants for maintenance up to a fixed maximum (\$589,000) and also makes an allowance toward capital expenditures for buildings and equipment equal to fifty per cent of the provincial allowance for these purposes. Under this arrangement a payment of \$333,498 was received on account of capital expenditures and the provincial expenditures were far in excess of the amount required to qualify for the maximum grant under the maintenance clauses.

ATTENDANCE

The day school enrolment for 1949-50 was 31,852, a figure differing by about four hundred from that of the previous year.¹¹ The enrolment in evening classes was 58,793, an increase of nearly 3,000 over the preceding year. The nearly stationary day school enrolment and the increasing attendance in evening classes are conditions which have been noticeable for several years past.

¹⁰ For tables see p. 179

¹¹ For tables see p. 179

TEACHER SUPPLY AND TRAINING

The generally inadequate supply of properly trained teachers for all phases of vocational education constitutes one of the greatest problems restricting its present development. There has been a steady demand from the smaller centres for the introduction of instruction in home economics, industrial arts, and commercial options. In the larger centres of population the extension of the curriculum to provide suitable new training opportunities for students who normally leave school at or about age sixteen creates a new and additional demand for teachers of trade subjects.

Summer school courses, the usual type of special training for applicants already possessing a teaching certificate, have enabled 130 teachers to qualify for Commercial certificates, 83 for Home Economics certificates, and 140 for Industrial Arts certificates.

In addition to the regular summer school courses for the training of Industrial Arts teachers, Saturday classes have proved their worth as a further means of training teachers in service. During the past year a new class was organized for the Kenora district. In Home Economics the research group organized a ten-day workshop study to train eighteen teachers in speed techniques for clothing construction.

The Technical Research Council of the Technical Section, Ontario Educational Association, conducted its annual refresher course for teachers at Balsam Lake with twenty-four teachers in attendance. This course differed from previous courses in that time was devoted to the development of newer approaches to the teaching of academic subjects in courses terminating at the end of Grade X.

ANNIVERSARY

The teachers of Industrial Arts used the 1950 Easter Convention to mark fifty years of progress in their special field. The first Inspector of Manual Training classes in the Department of Education, Mr. A. H. Leake, who was appointed in 1900, was present at the anniversary meeting and addressed the members. To further mark the occasion the Industrial Arts Research Committee published a special bulletin with appropriate articles and messages.

GREER MEMORIAL AWARD

The Greer Memorial Award is made annually to recognize an outstanding contribution to the advancement of education in Ontario. This year the Technical Research Section of the Technical Section of the Ontario Educational Association was honoured for its eminent services to technical education.

3. PROVINCIAL TECHNICAL INSTITUTES

LAKEHEAD TECHNICAL INSTITUTE

The Lakehead Technical Institute at Port Arthur has arrived at a temporarily static position. The courses in Technical Mining and Technical Forestry have been established to the satisfaction of industry. Students graduating from the first year university courses are accepted into advanced standing at the universities of Ontario and Manitoba. Special classes for elementary school teachers and for other regularly employed adults are very popular.

Before any appreciable expansion or development can take place enlarged quarters are necessary. The Advisory Committee have been most active, working toward the establishment of permanent, adequate quarters and the incorporation of a junior college in connection with the Institute.

The Committee and staff do not foresee any marked increase in total enrolment under present arrangements; they expect to register about one hundred students each year. Students are drawn principally from North-western Ontario, but there is an ever-increasing number from Eastern Ontario applying for admission to Forestry.

PROVINCIAL INSTITUTE OF MINING

The year 1950 opened with an enrolment of forty-one students at the Provincial Institute of Mining at Haileybury, and in May a class of eleven completed the two-year course. In September the Institute reopened with an enrolment of 29 students in the two-year course and 18 in the three-year course, a total of 47 students.

Good opportunities for mining technicians continued, and all graduates obtained suitable positions in the industry. The majority went into the survey and engineering offices of the mines or into the assay offices, geological departments and mills. Since the opening of the Institute in 1945, one hundred graduates, about fifty-five per cent of the total, have obtained positions in the survey and engineering offices. The others are engaged in various technical occupations in the mining industry.

PROVINCIAL INSTITUTE OF TEXTILES

In June, 1950, the Provincial Institute of Textiles at Hamilton graduated its first class of 13, all of whom found immediate employment in the industry. In September the Institute reopened with a full-time enrolment of 38 students, 18 in the First Year, 9 in the Second Year, and 11 in the Third Year. Three part-time students enrolled in the day school. In October the evening school reopened with an enrolment of 155, representing 35 textile firms located in Brantford, Dunnville, Galt, Guelph, Hamilton, Hespeler, Paris, Preston, Toronto, Waterford and Welland.

The textile industry has contributed a further sum of \$10,000 for machinery, bringing their total contributions for this purpose up to \$120,000. Payments by individual firms for sponsorships, bursaries and scholarships exceeded \$15,000 during the year. Used equipment has been made available as required and many textile supplies have been donated when requested.

The Institute continues to offer courses in the technical aspects of the cotton, woollen and worsted systems of spinning, knitting, weaving and textile dyeing and finishing.

RYERSON INSTITUTE OF TECHNOLOGY

The Ryerson Institute of Technology at Toronto offers courses of two and three years' duration in eleven broad fields: architectural technology, electrical technology, graphic arts, furniture design and fabrication, jewellery arts, photography, home and institutional management, fashion, retail merchandising, industrial chemistry, mechanical and industrial technology.

Advisory committees composed of men and women drawn from the industries concerned have been of inestimable value in assisting the authorities of the Institute in such matters as courses of study, purchase of equipment, and qualifications of staff. They have also been instrumental in raising sums of money for bursaries and scholarships. In addition, they have assisted in the placement of the graduates and have acted in a liaison capacity between the industries concerned and the Institute. These committees have contributed greatly to the Institute's rapid growth and development.

The demand for the type of instruction given at the Institute was such that the enrolment increased to the point where it is difficult to house all the

students who apply. The number enrolled in the diploma course was 825; in the special up-grading courses for industry, 45; and in the part-time courses, 323. The last number includes the students from the University of Toronto who are registered in the Occupational Therapy and Institutional Management Courses and who take their practical work at Ryerson. In the evening classes 2,307 persons were enrolled.

In addition to housing its own students, the Institute provides accommodation for the apprenticeship classes operated by the Department of Labour and the Nursing Assistants classes that are held under the auspices of the Department of Health.

The new courses in Applied Electricity, Food Administration and Home Economics, which were started in September, have been well received. It is evident that they will fill a need in the economic life of the province. At the request of the University of Toronto the course in Institutional Management is being transferred to Ryerson commencing September, 1951. It will be renamed "The Hotel, Resort and Restaurant Administration Course."

The Institute operates its own radio station, which is on the air for five hours daily during the academic year. It also publishes a student newspaper and an annual calendar.

Professional Training

ENROLMENT

The eight Provincial Normal Schools had a total enrolment for the 1950-51 session of 1,704 students, an increase of 223 students over the enrolment of 1949-50.¹² Definite increase was also registered at the Ontario College of Education, which had an enrolment of 534 students in courses for High School Assistant's, Library, Home Economics, Vocational Training, and Industrial Arts and Crafts certificates. This enrolment was 64 greater than that of the previous year.

In the fifteen years before 1949, an average of 10.6 per cent of Grade XIII students in the Provincial secondary schools entered Normal School in the following year to take the course leading to the First Class certificate. The percentage varied little during this fifteen-year period, but in September, 1949, it advanced to 13.6, and in September, 1950, to 15.3.

RECRUITMENT

Two special efforts were made to encourage the recruitment of teachers for elementary schools in the year under review: the organization of Committees of Selection in the Normal Schools, and the use of the "teaching try-out" experience with senior students in secondary schools.

Early in 1950 a Committee of Selection was organized at each Normal School, with the principal as chairman and with other members appointed from the Normal School staff, the inspectorial staff, and the Ontario Teachers' Federation. One or more representatives of these Committees visited the secondary schools of the province to interview applicants for admission to Normal School. Principals of secondary schools informed the Committee of students in Grade XIII interested in teaching as a vocation, and advertisements, stating the requirements for entrance to Normal School and advising any interested and qualified persons to request an interview, were inserted in daily and weekly newspapers with a view to reaching possible

¹² For tables see p. 55

applicants no longer in high school. At the time of each interview, effort was made to assess the personal qualities of the applicant in so far as teaching was concerned as well as to answer questions raised by the student. Progress reports were made to the Department of Education. Committees gave special study to certain cases, and requested the medical examination of some applicants before the opening of the school term.

Values realized by the work of the Committees of Selection included: arousal of increased interest in teaching as a vocation, spread of accurate information about the education of teachers, and a gain in experience by Committee members in assessing the personal qualifications of applicants.

The second special effort was encouragement of the "teaching try-out" experience, a plan designed to give interested senior high school students an opportunity of observing and teaching elementary school pupils in the classroom. A number of high school guidance departments had been using this plan with such success that, in 1950, the Provincial Director of Guidance, with the co-operation of educational officials in Galt, prepared a pamphlet outlining the steps of the method. It is expected that the information thus made available will lead to more general use of the "try-out" plan in the high schools of the Province.

TEACHER SUPPLY

Except in such special fields as girls' physical education and home economics, the supply of teachers for secondary schools was adequate during the year. The supply for elementary schools improved but remained below that required.

No reduction was made in the academic requirement for admission to the First Class course in the Normal Schools during the year, standing in five Grade XIII papers, including one English paper, being required as in 1949. Normal School emergency summer sessions for the training of teachers employed on Letters of Permission were again held at the Toronto and North Bay Normal Schools. Applicants for these courses were required to hold at least Middle School standing and to have taught in the Province for at least five months. A total of 296 candidates qualified for Deferred Interim Second Class certificates at the First Year Course, and 262 candidates qualified for Interim Second Class certificates at the Second Year Course at the summer sessions.

MEDICAL EXAMINATIONS

As a result of the medical examination of applicants for admission to the Normal School course and those of the Ontario College of Education during the year, thirteen applicants were rejected and fifty-two were required to waive disability privileges under the Teachers' Superannuation Act. The cost of this medical examination was met partly by fees paid by the students and partly by the Department of Education and the Teachers' Superannuation Commission.

Schools Attended by French-speaking Pupils

TEACHER SUPPLY

In 1949-50 there were 147 teachers-in-training at the University of Ottawa Normal School, 22 of whom enrolled in the First Class course and 125 in the Second Class course. As a result of the term and final examinations 22 students were awarded First Class certificates, and 109 obtained Second Class certificates.

There were in this school year 1,819 French-speaking teachers employed in the elementary schools. Of this number 1,553 or 85.37 per cent held First or Second Class certificates.

SECONDARY SCHOOL CLASSES

The total enrolment of French-speaking students taking advanced French courses in secondary schools was 2,370.¹³ There were twenty-six schools in which these courses were provided, including the newly-established Cornwall St. Lawrence High School, which was opened in September, 1950, with an enrolment of 247 French-speaking students.

To give a more complete picture of the secondary school enrolment it should be added that besides the 2,370 students reported above there were 1,454 French-speaking pupils enrolled in Grade IX and X classes of elementary schools and 1,653 French-speaking students attending inspected private secondary schools in Ontario. Inspected private schools may, on the recommendation of the inspector, qualify for certain privileges in reporting the standing of their pupils.

ELEMENTARY SCHOOLS

There were 52,587 French-speaking pupils enrolled in public and separate elementary schools in 1950, an increase of 2,091 over the preceding year.¹⁴ The total of 52,587 includes 1,454 students in Grade IX and X classes in elementary schools, and 228 pupils in auxiliary classes.

CORRESPONDENCE COURSES

In June, 1950, ended the eighth school year in which correspondence courses for French-speaking children of Ontario were given by the Department of Education. All the courses for pupils of Grade I to Grade VIII have been available since September, 1946. Enrolment figures are shown in Part II of this report.¹⁵

¹³ For tables see p. 104

¹⁴ For tables see p. 103

¹⁵ For tables see p. 213

Agriculture

The regulations of the Department of Education provide for instruction in Agriculture in elementary and secondary schools as an optional subject and for payment of special grants to boards of schools in which instruction is offered.

The study of methods of producing, processing and marketing farm products and practices in vegetable and flower growing form a part of the school curriculum. An understanding interest is thus developed in the importance of agriculture and the interdependence of urban and rural communities.

ELEMENTARY SCHOOLS

In elementary schools Agriculture may be taken in Grades VII and VIII as an optional subject. Present courses provide that agricultural topics are included in Natural Science of Grades IV, V and VI and in General Science of Grades VII and VIII for which no special certificate in Agriculture is required.

Reports were received from 1,492 schools, of which 775 were eligible for grants. It is worthy of note that the remaining 717 schools taught Agriculture, though not eligible for grants as the teacher held no special certificate in Agriculture.¹⁶

Interest in school ground improvement is being fairly well maintained. There were more entries in the Provincial competition last year than in any previous year.

School Fairs are maintained in some parts of the province. These are organized under local committees with the assistance of the Agricultural Representative and the inspector.

On the whole the interest in agricultural instruction is being maintained. Attention is being given in many schools to imparting an elementary knowledge of plants, insects, soils and other topics related to agriculture, even though some of the teachers have not taken special training in this field. Four Regional Conferences of Normal School masters and inspectors have been held in the past year in an effort to stimulate interest in agricultural studies in the schools.

SECONDARY SCHOOLS

Instruction in Agriculture is provided in the secondary schools in two ways. Some schools provide courses in Agricultural Science which are optional with General Science and in which agricultural topics are taken along with the topics of the Science courses. These courses are taken in Grades IX to XII in 143 schools and in Grades IX and X in 38 schools. The boards have provided reference books, magazines and equipment relating to agricultural topics. This combination of courses seems to meet with general approval, particularly in smaller schools and those serving rural areas. Many of these schools cannot provide any other form of agricultural instruction.

Another type of organization is found in schools which have adopted the programme of Agricultural Science and which operate under regulations for Departments of Agriculture. The programme in these schools includes a two-year general course through Grades IX and X and provides for instruction in Agriculture and Shop Work for boys and Home Economics for girls. Commercial work is optional with the languages in Grade X. This year Middle School courses are taken in 17 schools. The revised programme was initiated in the summer of 1944 and the number of schools now in operation has increased from 12 to 70. Provision is made in these schools for the

¹⁶ For tables see p. 203

serving of a hot dish at noon hour and for the use of the school as a community centre.¹⁷

During the past year 8,000 pupils in 183 schools took part in home project activities. Of this number 3,000 were enrolled in club work, most of the clubs being directed by the Agricultural Representative; 700 were in Calf Clubs, 232 in Grain Clubs, 170 in Poultry Clubs, and 270 in Home Beautification Clubs. Approximately 1,000 pupils took part in county live-stock and seed judging competitions, and 125 in school and county competitions.

Departments of Agriculture are in operation in 68 schools under General Regulations and in 2 schools under Vocational Regulations, making a total of 70.

The number of schools introducing the programme under Regulations for Departments of Agriculture has shown a regular increase each year since 1943-44, when 12 schools were taking work beyond Agricultural Science. In 1944-45 there were 30; in 1945-46, 42; in 1946-47, 53; in 1947-48, 56; in 1948-49, 60; in 1949-50, 66; and in the current year, 70. Boards of several schools in new High School districts will introduce the programme next year when new buildings are completed.

TEACHER SUPPLY

Altogether 323 teachers are engaged in giving agriculture instruction in secondary schools. While all schools with Departments of Agriculture have qualified teachers there is still a shortage of teachers properly certified in agriculture, and this shortage is felt chiefly in the smaller schools. The number of teachers granted permission was 26, nine more than last year.¹⁸

Teachers qualify for certificates in agriculture in several ways. Graduates of the Ontario Agricultural College may attend the Ontario College of Education. Those with other professional qualifications take summer courses in Agriculture at the Ontario Agricultural College.

Instruction in Agriculture is a part of the regular course at Normal Schools. The instructors are capable and a good course is given as far as the time allotment on the Normal School programme will allow. Normal School students who have taken four years of Agricultural Science during the High School course are eligible for the Interim Elementary certificate on completion of the Normal School course. Others must attend summer courses to secure the certificate.

The enrolment in the summer school for 1950 was as follows: Elementary II, 17; Intermediate I, 23; Intermediate II, 22; Specialist, 25; Inspectors, 4; Farm Mechanics, 21; total 112.

PRACTICAL WORK

There are now forty-two schools with special Agricultural classrooms. Practice is provided in gardening and in experimental plots in 146 schools; in the care of poultry during the winter and raising chicks in the spring in 75 schools; in beekeeping at 60 schools; in greenhouse practice at 3 schools. Buildings for agricultural purposes have been built at Blenheim, Palmerston, Elmira, Oakville and Exeter. In addition, provision is made for supervising home projects of an economic nature by the teacher during the summer months. These projects include activities in calf clubs, poultry clubs, home garden clubs, grain clubs, swine clubs and similar practical farming operations, which in several areas are carried on jointly by the teacher of Agricul-

¹⁷ For tables see p. 203

¹⁸ For tables see p. 203

ture and the Agricultural Representative. Several thousand pupils attended the Royal Winter Fair in November by special arrangement.

GRANTS

Grants for 1950 for Agriculture in elementary schools totalled \$21,135.00, and grants for Agricultural Science and Departments of Agriculture totalled \$125,426.22.

Art

SUPERVISION AND TRAINING

Meetings of teachers have been held in some twenty inspectorates, with illustrated lectures in which particular emphasis was placed on picture making. Art education workshops in which teachers participated in large numbers have been organized in many rural and urban areas. The summer course in Art and Crafts had again to be limited to an enrolment of 500. Thirty Community Programmes workers were included in this number.

PUBLICATION

A small illustrated book CHILDREN AND THEIR PICTURES was published and issued in quantity to Normal Schools and to Inspectors. This book offers in condensed and simplified form an outline of approved practices in classroom picture making. Inspectors were asked to make use of the book wherever difficulties were being encountered in developing a picture-making programme.

SPECIAL PROJECTS

Classes in Art for sixty children showing outstanding ability in this field were held in the Ryerson Institute of Technology on Saturday mornings from October to March inclusive.

Research in art education was continued at the Essex School Art Unit, organized jointly by the Department of Education and the Toronto Board of Education in 1948.

Audio-visual Education

TEACHER TRAINING

The summer course in Audio-visual aids was held in Toronto. Teachers were trained in the operation of many types of audio-visual equipment, and demonstration lessons were given to show how these aids could be used in the classroom to enrich many types of teaching.

SCHOOL BROADCASTS

A programme for ninety-four school broadcasts covering fourteen different school subjects was prepared for use in the elementary and secondary schools in the province. These broadcasts were presented in co-operation with the Canadian Broadcasting Corporation over a series of twenty-three stations. A teacher's manual outlining the programme was distributed to all Ontario teachers in September.

Two surveys of the educational value of these broadcasts were made during the year. Helpful suggestions and criticisms were received and some changes were made in the programmes as a result.

The policy of correlating visual aids of all types with the broadcasts was continued as a result of recommendations received from Teachers' Conventions and school inspectors. Non-projected aids seem to prove most useful, and a careful search for suitable maps, posters, picture sets and booklets was made prior to the publication of the radio manual.

Three exchange broadcast series from other provinces were included as an experiment. Reports received at the Department served to indicate that this policy has proved useful in our schools.

FILMS AND FILMSTRIPS

Approximately 150 additional schools registered with the Visual Education Branch for film service during the year. A supplementary film catalogue was prepared and distributed to schools using the film service of the Visual Education Branch. This catalogue contained descriptions of seventy-five new films added to the library during the year. A section showing correlation with the Programme of Studies was included as a guide to teachers in their selection of films. There were 92,819 screenings of educational films from the Visual Education Branch to a total school audience of 5,515,273 students during the year.

Revision of the recommended filmstrip lists for elementary and secondary schools served to stimulate further interest in this visual aid. Many schools are now making good progress towards building up their own local libraries of filmstrips.

Auxiliary Education

URBAN ORGANIZATION

In elementary schools thirty-six new classes were organized in 1950. These classes may be grouped as follows: Handicraft classes, 9; Opportunity classes, 6; Opportunity classes in Remedial Reading, 6; Speech Correction and Lip Reading, 7; Orthopaedic classes, 2; Sanatorium classes, 2; others, 2.¹⁹

In secondary schools special groups were organized by the local authorities in the Fort William Collegiate, the Kenora High School, the Long Branch High School and the St. Catharines Collegiate and Vocational School. Other groups are being organized in the Toronto secondary schools. Two types of special service are represented: (i) a remedial reading service in the Kenora and Fort William schools, and (ii) a special course provided in the Long Branch and the St. Catharines schools for a group who continue to need individual teaching.

The experimental classes in the Fort Frances High School and the Toronto Central Technical School have continued with their previous success in readjusting students and in holding them longer in school. Where courses and instruction have been adapted to the individual needs of the student, the results have been superior to any of the so-called pre-vocational courses which had been offered previously in the larger centres.

In London the Student-aid services have demonstrated the value of individual instruction. This service is for the student who has been absent for any reason or for the student who feels the need of assistance in a subject.

¹⁹ For tables see p. 102

Rural surveys were conducted in fifteen inspectorates by the resident inspector with the assistance of inspectors from the Auxiliary Education Branch. More than 1,000 children were examined.²⁰

A number of counties have been considering how they might best provide special educational services for rural schools. A possible solution is to secure an itinerant teacher with some of the following qualifications: training in individual teaching methods suited to the speech, sight or hearing defective; training in methods of instructing the backward child and the child retarded in reading, arithmetic and language; the ability to enlist the co-operation of the classroom teacher and give directions and training to the classroom teacher while retaining a number of pupils for personal instruction. Such a teacher would have to be capable of diagnosing educational problems, laying out remedial measures and meeting satisfactorily the questions of both teachers and parents.

SPECIAL EDUCATION

The trends in special education everywhere indicate its extension to pre-school and adult levels and an expansion of its scope to meet a greater variety of needs. In keeping with these trends the Toronto Board of Education has established pre-school classes for deaf children. During this last year several centres were opened for children too young mentally for school attendance, following the pattern established by the pilot class in Kirkland Lake. While these are not officially connected with the educational system there has been considerable consultation with and help given by the Auxiliary Education branch.

On the adult level a considerable number of habilitation units for paraplegics and sufferers from crippling diseases have been organized to train these young people to fit in to the industrial life of the community. A number of rehabilitation units have been formed to aid men and women who because of tuberculosis, arthritis, poliomyelitis or similar physical disability must be retrained to take a new place in society. For these purposes teachers have been sent to Lyndhurst Lodge, the Isolation Hospital, and other institutions when a teacher was required.

PROVISION FOR CRIPPLED CHILDREN

Provision for crippled children in the province includes:

- (i) Bedside teaching in hospitals, provided by boards of education in Hamilton, London and Toronto,
- (ii) Home instruction classes in urban centres and units in rural areas, for children homebound from physical defects, arranged through boards of education;
- (iii) Transportation to school for children attending orthopaedic classes and units,
- (iv) Day classes:
 - (a) Under boards of education in Chatham, Hamilton, Kitchener, London, Ottawa, Toronto, Windsor,
 - (b) Under public school boards appointed under the Public Schools Act in Woodeden near London and Variety Village near Toronto,
- (v) Volunteer centres providing care and treatment for cerebral palsied children in Chatham, Hamilton, Toronto,

²⁰ For tables see p. 102

- (vi) A hospital centre for 22 junior cerebral palsied children at Woodeden, under the Ontario Society for Crippled Children where children are kept a few months for inaugural training,
- (vii) A residential hospital for 24 boys at Variety Village, maintained by the Variety Club of Toronto,
- (viii) A residential home, the Home for Incurable Children, for children 16 years of age and under, in Toronto.

A residential school similar to those provided for the deaf and blind children is needed to cope with the problem of the crippled child.

Guidance

During 1950 an attempt was made to expand the guidance services within the schools on a sound basis while avoiding the danger of "spreading too thin." Guidance involves certain services which can and should be undertaken by any school even if no staff member has specialized training in the field. On the other hand there are services which should be handled only by those who are trained in guidance. It is essential that the guidance services be consistent with the available facilities of the school and with the extent to which individual teachers have the necessary specialized training.

The voluntary movement toward guidance services in the elementary schools gained momentum. The guidance services in the secondary schools have been strengthened by the practical work which has been done. It is now generally recognized that guidance is concerned with the provision of assistance to all students in order that they may have access to the latest available educational and occupational information, that they recognize their limitations and potentialities, develop their abilities to the fullest possible extent, and utilize this knowledge and development in their school and post-school courses.

INFORMATION

In order that all pupils might have some general assistance in getting information about educational opportunities and vocational requirements, the Ontario Department of Education continued its arrangement with the Vocational Guidance Centre of the Ontario College of Education whereby each secondary school and each elementary school inspector received free of charge, nine times a year, a parcel of the latest available guidance material.

During 1950 the production of occupational information by the Economics and Research Branch of the Dominion Department of Labour was greatly increased. This material has been furnished free of charge to the Guidance Branch which, in turn, has distributed it to the schools.

The Grade IX course in Occupations was still the only obligatory part of the guidance service. It has been such a useful and economical means of meeting certain common needs that many schools are now providing additional group work in one or more of Grades VII, VIII, IX, X and XII. The text-notebooks of the Vocational Guidance Centre have provided excellent material for study in these classes.

Conferences of high school principals, counsellors, and the faculties of the universities were held at McMaster University, Queen's University, and the University of Western Ontario. Principals and counsellors were given an opportunity to get first-hand information about the different university courses. Furthermore, these conferences fostered mutual understanding, and

laid the basis for the interchange of information which will be helpful to those secondary school graduates who pursue further education in the universities.

Circular 1:3 entitled GUIDANCE IN THE INTERMEDIATE DIVISION was published in April, 1950. It is an 80-page statement recording basic principles and practices of guidance and was offered as a concise practical handbook for guidance workers in the schools.

An outstanding feature of the year's work was the introduction of the "Ontario School Record" system. The suggested plan with its accompanying forms provides a means for the development of records which are both integrated and cumulative. They pool significant data which throw light on the individual's development and needs over a definite period of time. In addition to showing trends in development they integrate and present the data by time sequences in a manner which affords a picture of the individual's accomplishments at any given time. These records also offer an opportunity for continuity throughout the school system.

Excellent co-operation was given by the schools participating in the follow-up study of the Canadian Research Committee on Practical Education. The schools succeeded in getting questionnaires returned by 4,227 students. This was 36 per cent of the total number who withdrew from these schools in 1948.

A series of six fifteen-minute broadcasts on guidance was presented in co-operation with the Canadian Broadcasting Corporation over a network of Ontario and Quebec stations. In order to make these broadcasts more effective, lesson aids to accompany the broadcasts were supplied to all secondary schools and made available, on request, to all elementary schools.

TEACHER TRAINING AND SUPPLY

In the summer of 1950 the Ontario Department of Education once again offered to teachers summer courses leading to Elementary, Intermediate and Specialist Guidance certificates. One hundred and sixteen teachers registered in these courses. Over nine hundred teachers in Ontario now have had some training in the field of guidance.

While it might appear that this number of people with training would be adequate to meet the demand there is a tendency for schools having teachers with training in guidance to send others for training. This has resulted in a clustering of trained people in certain schools. While this is, in many ways, desirable because it results in more efficient work in these particular schools, it is somewhat deceiving because many schools still do not have a single teacher who has taken training in guidance. Schools of various sizes which do not have a staff member trained in guidance may be classified as follows: two schools with a staff of over twenty teachers, fifteen schools with a staff of ten to nineteen teachers, fifty-nine schools with a staff of five to nine teachers, and one hundred and nine schools with a staff of one to four members.

PLACEMENT SERVICES

Traditionally most vocational schools, and some academic schools provide a job placement service for their students. Over a period of many years certain schools have built up a clientele of employers who look to them when filling positions suitable for entry applicants. This job placement service has been a very valuable part of the guidance services and has been materially strengthened, in a number of Ontario centres, by close co-operation with the Special Placements Section of the National Employment Service.

Music

MUSIC INSTRUCTION

Eighty-six per cent of the classrooms in elementary schools in Ontario provide regular courses in music under the supervision of qualified music teachers. All city classrooms offer courses, and eighty-five per cent of classrooms in the counties and seventy-eight per cent of classrooms in the districts. These percentages are practically unchanged from last year except for a definite increase in the districts.²¹

In the secondary schools 410 schools offer music. In the majority of them the courses are confined to Grades IX and X, but there are courses in the higher grades in many schools. Instrumental music receives attention in a number of schools in addition to vocal music. School choirs are to be found in more than 200 schools, and concerts and operettas are common school activities.²²

TEACHERS AND TRAINING

The number of qualified teachers and supervisors of music in the schools of Ontario in 1950 was 1,134, of whom 775 were in the elementary schools. These figures are unchanged from 1949. The enrolment in the summer courses held in Jarvis Collegiate, Toronto, was 416 and nine different courses in vocal and instrumental music were offered. Music is a regular subject of instruction in all the Normal Schools.

MUSIC OPTION

The number of pupils offering music as an optional subject toward a secondary graduation diploma is steadily increasing. For this purpose pupils may either take a school course if one is offered or they may submit certain certificates from the Royal Conservatory of Music, Toronto, or other accredited examining bodies. In 1950, by Conservatory certificates, 285 pupils from 131 schools obtained Grade XII standing and 220 pupils from 100 schools obtained Grade XIII standing. At the same time 448 pupils obtained Grade XII and 128 Grade XIII standing through school courses.

RADIO

The annual series of broadcasts given by the Department of Education in co-operation with the Canadian Broadcasting Corporation were continued in January, February and March, 1950. The usual division into Primary School Music, Grades I-III, Junior School Music, Grades IV-VI, and Music for Young Folk, Grades VII-X was followed.

CONCERTS

The concert tours promoted and underwritten by the Department of Education again provided an opportunity for secondary school pupils and their parents in small communities to hear good music provided by young Canadian artists. In 1949-50 sixty-three performers gave 152 concerts in 45 towns.

²¹ For tables see p. 206

²² For tables see p. 206

School Attendance

ENROLMENT

For the school year 1949-50 the total enrolment of the schools of the provincial system was 745,276, an increase of 32,864 over the previous year. The elementary schools showed an increase of 31,195 and the secondary schools an increase of 1,669. Only the continuation schools showed a decrease in total enrolment, and this is attributable to the transfer of pupils from these schools to the better equipped schools of new high school districts.²³

SCHOOLS AND TEACHERS

There were 5,899 public schools and 947 separate schools in operation in the school year 1949-50. The staffs of these schools numbered 16,306 and 3,740 respectively.²⁴

ATTENDANCE

Elementary schools had an attendance record of 93.0 per cent and the secondary school of 94.9 per cent, which may be considered as satisfactory. The common causes of absence all contribute, with illness responsible for about 70 per cent of the lost time.²⁵

EMPLOYMENT

The number of school children's employment certificates issued in the calendar year 1949 was 771. These are issued only to children under fourteen years of age, and are valid for not more than six weeks in a term. The number of home permits issued to adolescents from fourteen to sixteen years was 1,384. Employment certificates issued to adolescents fourteen to sixteen totalled 4,603. As a pupil must obtain a certificate for every change of employment the number of pupils affected would be less than the number of certificates issued. Comparable figures for 1950 are as follows: children's employment certificates 628; adolescent home permits 1,399; adolescent employment certificates 4,465.²⁶

Examinations and Scholarships

The Departmental Examinations branch is concerned mainly with the supervision of the Departmental examinations, the recording of standing, and the issuing of academic and professional certificates.

In recent years the administration of the student-aid programme, including Dominion-Provincial Student-Aid Bursaries and Transportation Assistance, has been an added responsibility of considerable importance.

DEPARTMENTAL EXAMINATIONS

Statistics showing the results of the Grade XIII and the Normal School examinations, as well as the number of Intermediate certificates, Secondary

²³ For tables see p. 68

²⁴ For tables see p. 68

²⁵ For tables see p. 69

²⁶ For tables see p. 69

School Graduation Diplomas, and Secondary School Honour Graduation Diplomas issued, will be found in Part II of this Report.²⁷

In the fall of 1949 the immediate discontinuance of the High School Entrance examination was announced. In 1950 pupils were promoted from Grade VIII to Grade IX upon the recommendation of their principals, subject to the approval of the elementary school inspectors concerned.

STUDENT-AID

(a) Dominion-Provincial Student-Aid Bursaries

When the first scholarships were established in 1943 many awards lapsed for want of suitable applicants. However, in recent years practically all of the available bursaries have been awarded and accepted. The purpose of the bursaries is to assist students of adequate ability who are financially unable to continue their education. In 1949-50 there were 1,155 awards made to students. The total amount distributed was \$229,820, including a contribution of \$60,000 from the federal government.²⁸

(b) Transportation Assistance

The transportation subsidies provided by the Department of Education for persons who reside in the territorial districts and are enrolled at an eligible institution have now been in operation for four years. In 1950 the sum of \$13,163.85 was paid in transportation assistance to 659 students. Of these 427 resided west of Sudbury and 232 east of Sudbury.²⁹

(c) Scholarships for Post-graduate Study in France

The Department of Education Act provides for the payment out of the Consolidated Revenue Fund annually the sum of \$600 to be awarded by the Minister of Education in scholarships to residents of Ontario for the purpose of enabling them to pursue courses of study in France. For the school year 1950-51 the holders of these scholarships were Miss Margaret Carleton of Guelph Collegiate Institute and Vocational School, Miss Glenise E. McKenna of Timmins High and Vocational School, Miss Ruby Stauffer of Niagara Falls Collegiate Institute and Vocational School, and Miss Bessie E. Stewart of Leaside High School.

INTERCHANGE OF TEACHERS

The Department of Education encourages interchange of teachers as a means of maintaining Commonwealth unity, of promoting national and international goodwill and understanding, and of broadening teachers' interests and their knowledge of educational methods.

For the school year 1950-51 thirty-three exchanges were arranged, twenty-two with the British Isles, eight with other provinces of Canada, and three with the United States.

²⁸ For tables see p. 205

²⁹ For tables see p. 205

Public Records and Archives

The chief purpose of the Archives branch is to collect and preserve government records of enduring value and to make these available to authorized persons, including serious students of history. It has also been a policy of the branch to accept or acquire, as occasion offered, records of all kinds which are of province-wide significance. Without a central repository in which documentary and other treasures can be preserved there is a great danger that much material of the greatest historical interest will be lost. Both these functions of the provincial archives will be better carried out with the completion of the new Archives building, and the transfer of the accumulated materials to roomier quarters.

Community Programmes

The Department of Education administers its provincial services in the fields of community recreation and adult education through its Community Programmes branch. The services provided by the branch are designed to encourage the development of programmes of cultural, social, physical and educational activities which may be sponsored by public and private agencies in the communities throughout the Province. In the main these services consist of annual grants to municipal councils establishing and maintaining public recreation programmes; a technical advisory service to municipal and community organizations; training courses for activity or group leaders; the preparation and circulation of periodicals, bulletins, and manuals and materials for training courses and the provision of Provincial services for the training of immigrants in Citizenship and basic English.

Towards the cost of these services in 1950 a grant of \$74,063.25 was received from the Federal Government as authorized under the National Physical Fitness Act.

ANNUAL GRANTS

Annual grants are paid to municipalities which appoint Municipal Recreation Committees under the Regulations of the Department of Education, and which establish or maintain municipal recreation services. This financial assistance has encouraged the widespread growth of public recreation services through the Province. Now 163 municipalities have organized public recreation programmes and 62 municipalities employed paid full-time directors of recreation. Five years ago eighteen municipalities received grants totalling \$10,213.90. In the fiscal year 1950-51, 138 municipalities received \$195,351.06.³⁰

Grants amounting to \$5,150 were also made to the following associations concerned with recreation and adult education: Ontario Recreation Association, Canadian Youth Hostels Association, Christian Work Camp Fellowship of Canada, Ontario Association of Film Councils, Ontario Camping Association and Ontario Council of Christian Education.

ADVISORY SERVICES

The branch provides advisory services to community groups and interested citizens through a headquarters staff of technically trained advisers

³⁰ For tables see p. 206

and through a staff of 13 field representatives operating from six district offices located in Fort William, North Bay, Ottawa, Toronto, London and Hamilton. These staffs supply consultation services by correspondence or personal visits, organize and conduct leadership training courses, and prepare and distribute publications and resource materials. During 1950 over 450 advisory visits were made to Ontario communities by the advisory staff. The volume and variety of the requests from community groups has made it necessary to expand these services during the past year and specialist advisory services are now offered in the following fields: Municipal Organization for Recreation, Parks and Recreation Facilities, Social Recreation, Physical Recreation, Drama, Films and Radio, Family Relations, Citizenship Training, Surveys and Research, and Arts and Crafts.

LEADERSHIP TRAINING

Since the scope and extent of adult education and recreation programmes are largely dependent upon the availability of trained leaders, the policies and resources of the Community Programmes Branch are primarily directed towards leadership training.

Municipal directors of recreation were offered a short course at Kingston in September, 1950. This course, with an enrolment of 50, was given in co-operation with the Extension Department of Queen's University.

Community group leaders were provided with courses in Art, use of Audio-visual Aids, Parent Education and Family Relations, Leadership Techniques, Handcrafts, Physical Recreation, Social Recreation, and Theatre. Altogether 148 courses with a total enrolment of 7,475 were held in 102 centres all over the province.

Rural group leaders attended night schools operated jointly by the Community Programmes branch and the Department of Agriculture. In 1950, twenty-one of these schools offering instruction in one or more of the following were conducted: Woodworking, Public Speaking, Sewing, Motor Mechanics, Folk Dancing and Singing, Hobby Crafts, Welding and Metalcraft, French, Farm Engineering, Drama, Weaving, Farm Science, Farm Machinery, Music, Wood Refinishing, Leathercraft, Home Decorating, Home Building and Repairs, Radio, Electricity, Shop Work, Art, Plastics and Art Metalwork, Oil Painting, Design, Home Nursing, Food and Nutrition, Rural Planning, Bookkeeping, Typing and Shorthand.

Advanced summer courses in art, crafts, music, and theatre are given to teachers and community leaders by the staff of the branch at the regular summer schools of the Department of Education.

PUBLICATIONS

There has been a marked increase during the past year in the demand for publications and instructional material on recreation and adult education which are prepared and issued by the Branch. These include THE COMMUNITY COURIER, a monthly magazine of general interest; literature and instructional aids in Citizenship, Parent Education, Theatre, Hockey, Baseball and Puppetry; and playground manuals on Arts and Crafts, Quiet Periods, Sports and Active Games, and Puppetry. Over 53,000 copies of these publications were distributed during 1950-51. The branch maintains a technical library service which lends books to recreation workers and distributes the Publications of the Physical Fitness Branch of the National Department of Health and Welfare.

CITIZENSHIP TRAINING

A training programme is conducted in Basic English and Citizenship for both newcomers to Canada and Canadian-born adults. Many of these classes are operated by local school boards, but in outlying districts classes are organized and teachers are paid directly by the branch. Teaching aids and literature issued by the Federal Government or by the Branch itself are supplied to these classes and examinations are held and certificates of proficiency awarded which are accepted by the judges before whom these newcomers appear when applying for Canadian Citizenship certificates. In 1950-51 there were altogether 14,006 students enrolled in 550 Citizenship training classes. Eighty-two of these classes were specially organized in places where school classes were not available.³¹

NEW SERVICES

The increasing public interest in community recreation has made it necessary for services to be offered in new fields. One of these is Employee Recreation, a field which is developing rapidly, particularly in defence industries. For this reason the Surveys and Research unit of the Branch undertook a survey of employee recreation programmes in a thousand manufacturing industries throughout Ontario. A report on this survey is being printed and will be issued in the near future. Research studies in other fields related to recreation are also being conducted.

Public Libraries

SERVICE

At the end of 1950 the public book service of the province was covered by 212 public libraries, 266 library associations and two fully organized township libraries. The larger public libraries operate 46 branches, making the total number of outlets 524. In addition there are 12 county library co-operatives serving rural communities in which no library has been established, carrying book service to approximately 1,400 rooms in rural schools, and strengthening the service already offered by village libraries and those in the smaller towns.

BOOKMOBILES

Three bookmobiles, or mobile libraries are in use, providing service in the suburban areas of York Township, Etobicoke Township and London.

LIBRARIANSHIP

Since the adoption of certification in 1946 there has been a steady increase in the number of professionally qualified librarians serving the province, although the demand for such trained personnel is still in advance of the supply. In the public service there are now 420 librarians holding certificates in Classes A, B and C. Those holding Class E certificates number 113.

GRANTS

Legislative grants to public and country libraries in 1950 were \$425,000. The total expenditures of libraries increased by \$310,000 over

³¹ For tables see p. 206

the previous year, and amounted to \$2,971,515. The increase in total expenditures was made up by \$45,000 in book purchases, \$222,000 in salaries and \$43,000 in maintenance and general costs.

USE OF BOOKS

Book circulation in 1949 reached a total of 14,700,000, an increase of 700,000. This total was made up of adult non-fiction, 2,500,000; children's books, 6,000,000; adult fiction, 6,200,000. The trend towards greater use of more thoughtful and useful books is still marked and is being strongly fostered by the libraries.

NEW LIBRARIES

During the year two new public libraries were established, two associations became public libraries, and three new associations were set up. One county council passed a county library by-law but was unable to have the library in operation in the current year.

TRAVELLING LIBRARIES

During the year 6,745 books were added to the Travelling Libraries stock, and 6,300 were withdrawn as being no longer fit for service. Boxes sent out numbered 1,486 and the books contained in them accounted for 66,940 issues. It is notable that, of this number, 54,000 were used in elementary schools.

Trade Schools

The number of schools registered in 1950 under The Trade Schools Regulation Act was 148. Applications for registration of six schools with head offices in the United States and without branch offices in Ontario were refused. There was one cancellation of registration for failure to comply with the regulations, and approval was given for the registration of three new schools.

DAY AND NIGHT SCHOOLS

Periodic inspections were made of these schools to determine the adequacy of accommodation and of the students' protection against fire hazard and accident. Courses of study and examination requirements were examined and teachers' qualifications were rated.

Because of increased accommodation costs and higher teachers' salaries approval was given for fee increases varying from ten per cent to twenty-five per cent.

CORRESPONDENCE SCHOOLS

The courses of study offered and the method of providing home-study services were inspected. Permission was granted for an increase in fees varying from ten per cent to fifteen per cent because of the increased cost of text-books, lesson assignments and administrative and teachers' salaries.

Physical and Health Education

OBJECTIVES

Specific objectives of the Physical Education branch are:

- (1) the improvement and organization of physical education programmes in the elementary and secondary schools of the province,
- (2) to give assistance and encouragement to teachers in the field,
- (3) to provide adequate training of teachers for organizing and teaching physical education,
- (4) to promote a better understanding of the educational value of physical education on the part of school and community personnel,
- (5) leadership training for secondary school children, especially as it applies to school athletics and camp counselling.

SUPERVISION

Visits were made to 230 secondary and 107 elementary schools, and time was devoted to discussing with the teachers their current problems and the planning of general programmes of activities.

Bulletins for men and women teachers, dealing with instructional methods and professional news, were prepared and distributed four times in the year.

TEACHER TRAINING

Summer courses in Physical and Health Education, each of five weeks' duration, were held for three different groups of teachers. A course at Guelph for elementary school teachers had an enrolment of 123; at Kingston 48 secondary school women teachers attended; and at Toronto there was an attendance of 44 secondary school men teachers.

Twenty-two short courses were held for elementary teachers in rural areas, with a total enrolment of 706. Nine courses of instruction for coaching and officiating in hockey, basketball, and track and field were held in different centres.

Assistance was rendered in the production of two films designed to help instruction in rural schools. Funds for this purpose were provided from the Strathcona Trust Fund.

CAMPS

Four leadership courses, each of two weeks' duration, were conducted at the Ontario Athletic Training Camp, Lake Couchiching. The candidates, 218 girls and 222 boys, were selected by secondary school principals and staff members. These students on their return provide leadership in athletics and recreation both in the school and in their community.

Two camps were operated to provide trained leaders for non-profit summer camps. At Belwood Lake two three-week courses were held, attended by 134 girls. At Bark Lake one three-week course and two two-week courses trained 120 boys. Counsellors trained in these courses are making a valuable contribution in the camps to which they go.

Subsidies amounting to over \$25,000 were paid to 197 non-profit camps. The camps receiving this assistance provided camping experience of from six to fourteen days for more than 20,000 boys and girls.

Ontario School for the Blind

ENROLMENT

One hundred and seventy-six pupils, including 94 boys and 82 girls, were enrolled at the Ontario School for the Blind in 1950, compared with a total of 188 pupils in the previous year. Three students left during the term, making the total at the end of the school year 173.³² The distribution of this enrolment by provinces was as follows: Ontario, 115; Alberta, 11; Manitoba, 17; Saskatchewan, 30.

Tables showing the visual acuity and the causes of blindness of the pupils will be found on p. 218. It will be seen that twenty-two of the thirty-two new pupils have some sight in each eye, and that four more have some sight in one eye. These twenty-six have at least sufficient vision to be able to get about safely, but not enough to enable them to obtain an education visually.

PROGRAMME

A balanced programme of academic, physical, and social activity was provided for the pupils in the light of their individual needs and capacities. Music and drama continued to receive emphasis, and highlights of the year were participation in the Brantford and Brant County music festivals, and the presentation of a one-act play at the Central Ontario Drama Festival at Hart House, University of Toronto. Academic instruction was given in all grades from I to XII. Group and team activities were features of the vigorous programme in physical education.

Ontario School for the Deaf

ENROLMENT

The enrolment of the Ontario School for the Deaf during the school year 1950-51 was 345. This total showed an increase of two pupils over the total of the previous year.³³

PROGRAMME

The school is organized in three departments. The junior department, in which the pupils range in age from 5 to 11 years, is a preparatory division in which initial instruction is given. The intermediate department for pupils aged 12 to 15 years provides instruction in sewing for the girls and manual training for the boys, in addition to an academic programme that includes language, reading, arithmetic, history, geography, nature study, and art. The senior department accommodates students of 15 years and over, and operates on a rotary basis. Students in this department divide their class time equally between academic study and vocational work. Courses in carpentry, printing, baking, barbering, business, and farming are provided for the boys. Courses in dressmaking, fancy sewing, beauty parlor work, laundry, cooking, general housework, and business are provided for the girls.

³² For tables see p. 208

³³ For tables see p. 207

Service Record

IN MEMORIAM

John Duncan Campbell, B.A., D.Paed., who retired on August 31st, 1945, from the position of Assistant Superintendent of Elementary Education, died February 24th, 1950, at his home, 70 Lascelles Boulevard, Toronto, in his seventy-fifth year. Dr. Campbell was born in the Township of Wellesley, Waterloo County, and received his elementary education in the rural school of S.S. No. 9 Turnberry, Huron County. He obtained his secondary education at Seaforth Collegiate Institute and Harriston High School. In 1895 he attended the Provincial School of Pedagogy and began teaching in U.S.S. No. 12 Culross, Bruce County, where he remained for four and a half years, resigning his position to become principal of Highgate Continuation School. Later he attended the University of Toronto and graduated in 1908 with First Class Honours in Mathematics and Physics. In September, 1908, he was appointed to the staff of Chesley High School and was named as principal in 1909. In 1913 he received an appointment from the Department of Education as Master in the Stratford Normal School, later serving in the same capacity at the Ottawa and Toronto Normal Schools. Under his skilful and steady guidance thousands of student-teachers learned the art of teaching. In 1928 Dr. Campbell was appointed to the staff of Inspectors of Technical Schools under the Department of Education, and one year later was named Assistant Chief Inspector of Public and Separate Schools, the title of which office was changed in 1944 to Assistant Superintendent of Elementary Education. Dr. Campbell remained in this official capacity until his retirement in 1945, ever carrying out the duties of this responsible position with outstanding care and ability. In 1943, Dr. Campbell was awarded the degree of Doctor of Pedagogy by the University of Toronto. His thesis related to the teaching of arithmetic and was a splendid contribution to education in this field. The educational system of Ontario benefited greatly from the services of Dr. J. D. Campbell, and his sound scholarship and good judgment won for him the respect of all his associates.

James Brown MacDougall, B.A., D.Paed., who had until his retirement in 1942 held the position of Assistant Chief Inspector of Public and Separate Schools, died on May 28th, 1950, at his home, 304 St. Clair Avenue East, Toronto, aged 79. Dr. MacDougall's career was particularly identified with the development of education in Northern Ontario. He was the first resident Inspector of Public Schools there, being so appointed in 1904. As a young man he travelled by primitive means of transportation the great stretches of Northern Ontario, establishing schools and school boards throughout the rapidly growing mining, agricultural and lumbering settlements. It was his initiative that started the unique system of Railway Car Schools, "schools on wheels," that still serve groups of children living in isolated communities at the small stations on the great east-west and north-south railway lines of Northern Ontario. During Dr. MacDougall's term from 1925 to 1942 as Assistant Chief Inspector he revised the system of recording school attendance, and had much to do with the first steps toward Consolidated Schools and Township School Areas. Dr. MacDougall was a native of Scotland, but received his early education in Almonte and his professional training in Perth Model School and Ottawa Normal School. He graduated from Queen's University in 1896 and from the Provincial School of Pedagogy as a Specialist in Classics in 1897. In 1918 he received the degree of Doctor of Pedagogy from the University of Toronto. He served in various important posts as a teacher, including that of principal of the North Bay Model School, and from 1911 to 1919 as Master on the staff of the North Bay Normal School. Further

details of Dr. MacDougall's career appear in the account of his retirement in the Minister's report for 1942. Subsequent to his retirement Dr. MacDougall devoted time to writing. He won distinction as the author of TWO THOUSAND MILES OF GOLD, a romance of Canadian mining, published in 1946. He was also the author of MISS CANADA'S RECEPTION, BUILDING THE NORTH, and THE REAL MOTHER GOOSE.

J. W. Hagan, M.A., former Public School Inspector for Oxford County (South) and Norfolk County (in part), died on November 25th. From 1917 to 1942 Mr. Hagan served as inspector in the Manitoulin area. He was born in North Walsingham Township in Norfolk County, and received his early elementary and secondary education in S.S. No. 17 North Walsingham, the Simcoe High School, and the Brantford Collegiate Institute. He took his professional training at the Norfolk County Model School at Simcoe and at the Ottawa Normal School. Later he completed the examinations of the Ontario School of Pedagogy in Toronto. Mr. Hagan taught for several years in rural schools. Later he served as principal of the Cainsville Public School and the Delhi Public School. He also taught in the high schools of Georgetown, Petrolia and Simcoe. He graduated from Queen's University, obtaining the Master of Arts degree, and won the gold medal in Animal Biology of the Honour Science Course. Mr. Hagan did much to advance the cause of education as a teacher, as a principal, and as an inspector.

John Hartley died in London on Tuesday, October 17, 1950. He was born in the Township of Turnberry, Huron County. He attended a rural school, Walkerton High School, Harriston High School, and Owen Sound Collegiate Institute. His professional training was obtained in Walkerton Model School, the Toronto Normal School, and the Ontario Normal College, Hamilton. Mr. Hartley taught for twenty years in Huron County. During five years of that period he was principal of Clinton Model School. He was principal of Vankleek Hill Model School for French-speaking teachers from 1912 to 1929. From 1929 until 1937 he was Assistant to the Chief Inspector of Public and Separate Schools. He was appointed to the inspectorate of Huron East in January, 1937, but retired in April, 1938, as a result of ill health. Mr. Hartley was active in church work in Clinton and was secretary of the Public School Board. He is survived by his widow, one son and two daughters. He will be remembered for his faithful service in the schools of Huron County.

A. A. Jordan, B.A., B.Paed., LL.D., former Inspector of Public Schools for York No. 3, died at his home in Toronto on October 27th, 1950. Born in Dufferin County, Dr. Jordan was a graduate of Queen's University. He became principal of the Model Schools at Meaford, Prescott, Port Hope, Kingston, and Sturgeon Falls. Dr. Jordan began his duties as Inspector on September 1st, 1915. In 1936 he was given an honorary degree of Doctor of Laws by Queen's University. As an educationist, Dr. Jordan had a splendid record. The services he rendered to teacher-training and to inspectorial work were outstanding.

E. E. C. Kilmer, B.A., passed away at Brantford on March 9th, 1950. Mr. Kilmer was born in Malahide Township, Elgin County. He received his education in the Aylmer Public and High Schools. He graduated from the University of Toronto and Queen's University. For many years he taught in the Brantford Public Schools and in the High Schools at Aylmer and Stratford. In 1908 he was appointed Public School Inspector for the City of Brantford, where he served with distinction until his retirement in 1929. For many years he was a member of the Brantford Board of Education. Mr. Kilmer maintained a keen interest in the Children's Aid Society, the Social Service League, the Brant County Historical Society, and the Y.M.C.A.

A. G. Leitch, B.A., B.Paed., former Public School Inspector in Toronto, died on May 18th, 1950. Mr. Leitch served for forty years as a teacher and inspector in Toronto schools. He attended high school at Dutton, and received

his first teaching experience as principal at West Lorne. In 1907 he became principal of Coleman Avenue School, which became part of the Toronto Public School system in 1909. Later he served as principal of Leslie, Park, and Ryerson Schools. In 1926 he received his Bachelor of Arts degree from Queen's University, and in 1928 his Bachelor of Pedagogy degree from Toronto University. In 1927 he was appointed Public School Inspector in the City of Toronto, a position which he held with credit to the profession and honour to himself until his retirement on December 31st, 1947.

R. A. A. McConnell, B.A., passed away on July 12th, 1950. Mr. McConnell was born at Aultsville, Ontario, where he received his public and secondary education. Mr. McConnell was a graduate of Queen's University. He had experience as a teacher and principal in the public schools of Madoc, Meaford, and Sudbury, and also served as a Model School principal in these centres. He was principal of the Palmerston Continuation School when he received his appointment as Public School Inspector for District Division 11 on September 1st, 1928. Mr. McConnell served this area as inspector until 1935, when he transferred to Lanark County, where he was inspector until 1939. In this year he was transferred to Northumberland and Durham Counties. On January 1st, 1941, he was transferred to Grenville County, with residence at Prescott. Mr. McConnell was an efficient teacher and principal, a very conscientious inspector, and advanced appreciably the cause of education in the different areas where he served.

Selkirk A. Morrison, B.A., who retired as Inspector of Public Schools for East Grey in 1940, died at his home in Meaford on October 25th, 1950. Born in Scotland, Mr. Morrison came to Canada as a child and settled with his parents in Grey County. He received his early education in the public schools of Bentinck Township and in Durham High School. After graduation from Model School, Mr. Morrison taught in several elementary schools in Ontario and one in Saskatchewan. Following his graduation from Queen's University he joined the staff of Barrie Collegiate Institute. He served later as principal of the High Schools of Markdale and Elmira. In 1927 he accepted an appointment to the inspectorate of East Grey, with headquarters in Meaford. Mr. Morrison entered whole-heartedly into community affairs, and was revered for his faithfulness and ready co-operation in every worthy project brought to his attention. In the educational field he is remembered especially for his early sponsorship of the teaching of music in the schools of his inspectorate, and for his capable leadership in improving the schools under his jurisdiction.

Lt.-Col. J. W. Odell, B.A., former Inspector of Public Schools for Northumberland and Durham No. 2, passed away on August 15th, 1950, at his residence, 356 Walton Street, Cobourg. Mr. Odell was in his 84th year. Born in England in 1866, he came to Canada in 1875. His elementary and secondary education was completed at Orono and Bowmanville. He obtained a Third Class Professional certificate in 1886 from the Port Hope Model School. After teaching public school for three years, he entered the University of Toronto, graduating in 1892 as Gold Medallist in Pure Mathematics. In 1895 he was appointed Mathematical Master in Cobourg Collegiate Institute, where he taught until the outbreak of the First World War in 1914. He gave valuable service to his country in the training of Artillery units throughout the duration of the war. In January, 1919, Mr. Odell was appointed Public School Inspector for Northumberland and Durham No. 2, from which position he retired in 1938. His wise counsel and helpful co-operation with boards of trustees and teachers were reflected in the progress made by the schools of this inspectorate during his period of office.

John R. Pickering, B.A., B.Paed., retired Inspector of Public Schools, passed away at his home in Uxbridge on June 29th, 1950. Born in Riceville,

Ontario, Mr. Pickering completed his elementary and secondary education in schools of that district. After attending Normal School he served as a teacher and principal in various schools of the province. His Bachelor of Arts and Bachelor of Pedagogy degrees were received from the University of Toronto. In his later years he was a member of the Senate of that University. Mr. Pickering received his appointment in 1935 as Inspector of Public Schools in District Division 13, with headquarters at North Bay. In 1939 he was transferred to the inspectorate of Hasting South, with residence in Belleville. From January, 1944, until his retirement in August, 1947, he served the inspectorate of Ontario North. Those associated with Mr. Pickering remember him as an excellent teacher and capable supervisor, whose ability and devotion to duty inspired all who had the honour of being associated with him.

Dr. John A. Marquis, the attending physician at the Ontario School for the Blind at Brantford, passed away on March 23th, 1950. His services to the school extended over a period of forty-nine years, a record which can rarely have been equalled in any institution. His love for the pupils was genuinely paternal and throughout his long association with the school he was found to be so constantly ready to serve by day or by night, so sympathetic in his care, and so efficient in his ministrations that he was beloved by all. Staff and students mourn the passing of a personal friend.

RETIREMENTS

J. Stanislaus Gratton, Inspector of Separate Schools for parts of Prescott and Russell Counties, took advantage of long service under the Department of Education to retire at midsummer of 1950. Mr. Gratton was born at Plantagenet, Prescott County, and received his elementary and secondary education at the public and high school there. His professional training was taken at the English-French Model School, Ottawa, in 1908, and at the Ottawa Normal School, session of 1910-11. Mr. Gratton was principal of the graded public school of No. 6 North Plantagenet, Plantagenet Village, 1911-12, and then was appointed to teach at the Sturgeon Falls English-French Model School, a position which he held from 1912 to 1915. During the year 1915-16 Mr. Gratton attended the University of Toronto. Recalled to Plantagenet, he again headed the school of No. 6 North Plantagenet for the year 1916-17, and then he received an appointment by the Department of Education as Inspector of English-French schools for Northern Ontario. Later, he inspected these public and separate schools in Essex County and elsewhere, and was transferred to Eastern Ontario in 1927, where he carried out his duties as Inspector with outstanding success until his retirement. Mr. Gratton holds the esteem and friendship of all with whom he has been associated during his long career as Inspector.

William E. Hume, B.A., D.Paed., for many years Inspector of Public Schools in the City of Toronto, retired on March 1st, 1950. Dr. Hume was born in Georgetown, where he received his elementary and secondary education. He obtained an honour degree from Queen's University, and in 1921 the University of Toronto granted him the degree of Doctor of Pedagogy. In partial fulfilment of the requirements for this degree he wrote the thesis, "The Improvement of Teachers-in-Service." Dr. Hume taught in Westport Continuation School, Meaford Model School, Brooklin Public School, Whitby Collegiate Institute, and several Toronto Public Schools. In 1922 he was appointed Public School Inspector. He was the originator of the "Opportunity Plan" books. He developed techniques for improving the articulation and the pronunciation of public school pupils. He devised a self-rating scale for teachers. For a time he was Chairman of the Toronto District Junior Red Cross Executive.

F. P. Smith, M.A., retired on August 31st, 1950, as Public School Inspector for Frontenac South No. 2 and the City of Kingston. Born in Augusta Township, in the County of Grenville, Mr. Smith received his elementary and secondary education in Prescott, and later graduated from the Prescott Model School, Hamilton Normal School, and Queen's University. Mr. Smith taught in rural schools in Grenville County, in Spencerville Continuation School, and in Prescott High School. Later he was principal of Parkhill High School, and Science Master in Brockville Collegiate Institute. Appointed as Inspector of Public Schools in 1920, he served from 1920 to 1927 in Prince Edward County, from 1927 to 1934 in the City of Kingston, and from 1934 to 1950 in Frontenac South No. 2 and the City of Kingston.

Leonard Wheelton, B.A., retired from the office of Superintendent of Windsor Schools in 1950. Mr. Wheelton received his elementary and secondary education at Cache Bay, Sault Ste. Marie, and Hamilton. Before moving to Hamilton he taught for two years in rural schools at Rydal Bank and at Steelton. In 1907 he graduated from the Ontario Normal College at Hamilton. From 1907 to 1910 he taught at Vienna and Oakville. After attending Queen's University he taught until 1915 in the Lindsay Collegiate Institute. Having obtained his Specialist certificate in Art, he was appointed to the staff of the Windsor Collegiate Institute. Later he served as principal of Central Collegiate Institute, the Hon. J. C. Patterson Collegiate Institute, and the Hon. W. C. Kennedy Collegiate Institute. In 1939 he was appointed Superintendent of Windsor Schools. Although Mr. Wheelton was primarily interested in education, he was always ready to serve any good cause. Outside of school, his interests lay in the work of the church and the community. He was a zealous worker for the Windsor Rotary Club, the School Safety Patrol Association, Teachers' Federation, the Windsor Swimming Club, and many other fine organizations.

Miss Catherine Ford, who had given forty-two years of outstanding service in the School for the Deaf, retired on superannuation in June, 1950. She was appointed to the staff in 1908, after having taught for six years in public schools in Simcoe County. In recent years her time had been devoted to the training of teachers for deaf children.

A Catherine Ford scholarship has been established out of contributions from friends of the school, from the present staff and from former staff members. Two pupils of the junior school will receive awards annually for progress in speech and speech reading. A plaque to commemorate the establishment of the scholarship has been placed in the school. On the plaque are the words, "All Her Talents She Gave, Withholding None."

Miss Helen A. McClung, M.A., Provincial Archivist of Ontario, retired on superannuation in May, 1950. She had been associated with Public Records and Archives since 1915. Her training as a historian proved eminently useful in the work of this branch and the expansion of the various collections and their increased usefulness through greater accessibility were due in very large measure to her efforts, always devoted to the public service.

A. C. Ritter, B.A., B.Paed., Public School Inspector for District Division 7 from 1945 to 1950, resigned from the Public Service on August 31st, 1950, to serve as Director of Education for the City of Kingston. Mr. Ritter was born in Woolwich Township in Waterloo County. He received his elementary and secondary education at Elmira and at Kitchener. After graduating from Toronto Normal School in 1924 he taught for two years in rural schools in Woolwich Township. From 1926 to 1932 he served in the Continuation Schools at Oil Springs, Orono, and Gore Bay. He was principal of Continuation Schools at Plattsville and Fenelon Falls from 1933 to 1937. In 1937 he was appointed principal of Leamington High School. Mr. Ritter joined the R.C.A.F. in 1941 and had several years' service as an Education Officer. For

some time during this period he was Command Education Officer for No. 1 Training Command. In 1945 he was appointed Public School Inspector for District Division 7, with residence at Sudbury.

George E. Tait, B.A., B.Paed., Inspector of Public Schools for Welland (in part) and Lincoln (in part), resigned in June, 1950, to become Associate Professor of Elementary Education at the Ontario College of Education. Mr. Tait is a native of Lambton County, where he received his elementary and secondary education. He graduated from the London Normal School and holds degrees from the University of Western Ontario and the University of Toronto. Commencing in 1931, he taught ten years in the London Public Schools. In 1941 he was appointed Director of the Anglo-American School in Bogota, South America. His educational work there was mentioned in despatches to the Canadian Government forwarded by the British Ambassador and the Canadian Trade Commissioner. After returning to Ontario in 1944, Mr. Tait served as Public School Inspector three years in Huntsville and three years in Welland. Of latter years he has become interested in the writing and illustrating of juvenile books. His best known stories are THE SADDLE OF CARLOS PEREZ and THE SILENT GULLS. He has also acted with the inspectors of the Niagara Peninsula in the production of four educational books.

J. Eugene Durrant, B.A., after serving for six years as a high school inspector, was appointed principal of Etobicoke Collegiate Institute in September, 1950. Before his appointment as inspector Mr. Durrant had been vice-principal and head of the department of mathematics at Guelph Collegiate Institute.

The following appointments were made to the provincial staff of inspectors during the years 1949 and 1950:

1. City of Hamilton:

L. E. Rouse, B.A., B. Paed., appointed Public School Inspector, January 1, 1949.

2. City of Ottawa:

- (1) Robert Westwater, B.A., D.Paed., formerly Public School Inspector, appointed Chief Inspector of Public Schools, August 1, 1949.
- (2) W. T. MacSkimming, M.A., B.Paed., Principal of Mutchmor Public School, Ottawa, appointed Public School Inspector, August 1, 1949.
- (3) T. A. S. McKee, B.A., B.Paed., Principal of Devonshire Public School, Ottawa, appointed Public School Inspector, August 1, 1949.

3. City of Peterborough:

P. D. Windrim, B.A., B.Paed., appointed Public School Inspector, January 1, 1949.

4. Haldimand:

H. A. Christie, B.A., B.Paed., Assistant Inspector in Norfolk, appointed Public School Inspector, January 1, 1949.

5. Norfolk:

D. R. MacDonald, B.A., B.Paed., Principal of North Public School, Simcoe, appointed Assistant Public School Inspector, August 1, 1949.

6. District Division 6:

A. G. McKay, B.A., Assistant Principal, Cody Public School, Sault Ste. Marie, appointed Public School Inspector, September 1, 1949.

7. R.C.S.S. Division 13:

Alexander Kuska, B.A., Business Administrator and Supervising Principal, Crowland Township School Area No. 1, appointed Separate School Inspector, August 1, 1949.

8. City of Kingston:

A. C. Ritter, B.A., B.Paed., Public School Inspector for District Division 7, appointed Director of Education, August 1, 1950.

9. City of London:

W. D. Sutton, B.A., B.Paed., appointed Public School Inspector, September 1, 1950.

10. City of Ottawa:

M. R. VanLoon, B.A., B.Paed., appointed Public School Inspector, January 1, 1950.

11. City of St. Catharines:

H. R. Partlow, B.A., B.Paed., appointed Public School Inspector, January 3, 1950.

12. City of Windsor:

T. C. White, B.A., B.Paed., Public School Inspector for Windsor Public Schools, appointed Superintendent of Schools, September 1, 1950.
C. R. Macleod, B.A., B.Paed., of the London Normal School staff, appointed Public School Inspector, September 1, 1950.

13. Elgin:

J. F. Lawless, B.A., Principal of Langton Public School, appointed Assistant Public School Inspector, September 1, 1950.

14. Essex:

F. A. Leitch, B.A., Assistant Public School Inspector, appointed Public School Inspector, January 1, 1950.
C. R. Crawford, B.A., Assistant Inspector without designated area, appointed Assistant Public School Inspector, January 1, 1950.

15. Grenville:

C. A. Holmes, B.A., B.Paed., Assistant to the Principal of the Ontario School for the Deaf, Belleville, appointed Public School Inspector, September 1, 1950.

16. Lambton No. 2:

A. V. Vincent, B.A., B.Paed., Principal of Ada Richards Public School, Windsor, appointed Public School Inspector, September 1, 1950.

17. Peel:

G. W. C. Nelson, B.A., of the Kitchener Public School staff, appointed Assistant Public School Inspector, January 1, 1950.

18. Renfrew North:

M. A. Craig, B.A., B.Paed., Assistant Public School Inspector in Wentworth, appointed Public School Inspector, September 1, 1950.

19. Wentworth:

W. G. Anderson, B.A., Principal of Queen Victoria Public School, North Bay, appointed Public School Inspector to assist Inspector J. K. Evans, September 1, 1950.

20. York No. 7:

Miss L. L. McNeill, B.A., of the Parkhill High School staff, appointed Assistant Public School Inspector, September 1, 1950.

21. District Division 7:

C. M. Elliott, B.A., of the Copper Cliff High School staff, appointed Public School Inspector, September 1, 1950.

22. R.C.S.S. Division 4:

Benjamin Michaud, B.A., B.Paed., of the Mattawa High School staff, appointed Separate School Inspector, September 1, 1950.

23. R.C.S.S. Division 5:

H. W. Cyr, M.A., B.Paed., Public and Separate School Inspector without designated area, appointed Separate School Inspector, September 1, 1950.

24. R.C.S.S. Divisions 17 and 18:

Miss Rose Lynch, B.A., B.Paed., promoted from Assistant Inspector to Inspector, associated with Inspectors J. M. Bennett and T. S. Melady, May 1, 1950.

25. R.C.S.S. Division 19:

J. C. Doyle, B.A., of the Toronto Separate School Staff, appointed Separate School Inspector, September 1, 1950.

26. Inspectors Without Designated Areas:

L. A. Code, B.A., of the Registrar's Branch, Department of Education, appointed Assistant Public School Inspector, September 1, 1950.

H. W. Cyr, M.A., B.Paed., of the Eastview High School staff, appointed Public and Separate School Inspector, January 1, 1950. (Later assigned to R.C.S.S. Division 5.)

C. A. Rath, B.A., Principal of Kirkland West School (Teck Township School Area), appointed Public School Inspector, September 1, 1950.

E. J. D. Webster, B.A., of the Community Programmes Branch, Department of Education, appointed Public School Inspector, January 1, 1950.

HIGH SCHOOL INSPECTORS

D. F. Dadson, B.A., of the staff of the University of Toronto Schools, was appointed a High School inspector on January 1, 1950.

W. T. Laing, B.A., principal of Wallaceburg High School, joined the High School inspection staff on September 1, 1950.

TRANSFERS

The following transfers have been made in the provincial staff of inspectors:

1. W. E. Eade, B.A., B.Paed., from Haldimand to York No. 5, January 1, 1949.
2. Elwood Oakes, B.A., B.Paed., from Leeds No 2 to Middlesex West, September 1, 1949.
3. Gordon Young, B.A., from Middlesex West to Leeds No. 2, September 1, 1949.
4. R. O. Staples, B.A., D.Paed., who was on leave of absence for one year, transferred to Ontario North, September 1, 1949.

5. W. G. Chatterton, B.A., B.Paed., from Renfrew North to Welland (in part); Lincoln (in part), September 1, 1950.
6. H. W. Knight, B.A., B.Paed., from Grenville to Ontario North, September 1, 1950.
7. Joseph Lapensee, B.A., from R.C.S.S. Division 27 to R.C.S.S. Division 26, September 1, 1950.
8. Lucien Laplante, M.A., from R.C.S.S. Division 5 to R.C.S.S. Division 27, September 1, 1950.
9. F. A. Moreau, B.A., B.Paed., from R.C.S.S. Division 4 to R.C.S.S. Division 7, September 1, 1950.
10. T. J. Thompson, B.A., B.Paed., from Lambton No. 2 to Oxford South, September 1, 1950.

NORMAL SCHOOLS

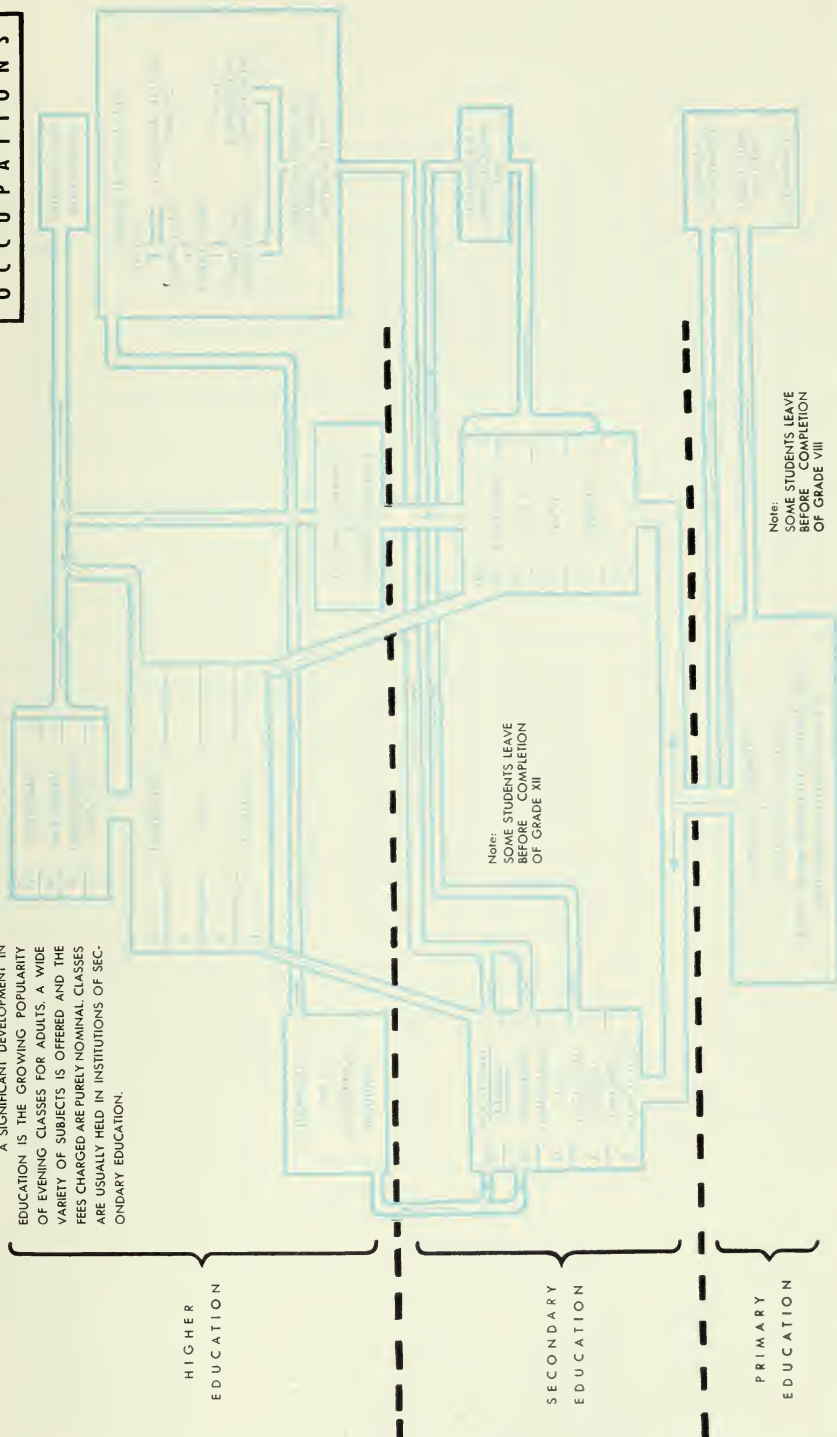

1. J. F. Kinlin, B.A., B.Paed., exchanged with C. P. O'Neill, M.A., London Normal School, for one year beginning September 1, 1949.
2. C. E. Potts, B.A., Assistant Inspector in Peel, transferred to Peterborough Normal School, September 1, 1949.
3. Miss Bertha Dick, B.A., B.Paed., transferred from York No. 7 to North Bay Normal School, September 1, 1950.
4. K. H. D. Hall, B.A., B.Paed., transferred from Elgin to London Normal School, September 1, 1950.
5. L. B. Hyde, B.A., transferred from Oxford South to London Normal School, September 1, 1950.
6. R. O. Staples, B.A., D.Paed., transferred to Toronto Normal School, September 1, 1950.
7. J. F. Kinlin, B.A., B.Paed., who had been on exchange for one year with C. P. O'Neill of the London Normal School, returned to R.C.S.S. Division 12, September 1, 1950.

PART II
STATISTICS

THE ONTARIO EDUCATIONAL LADDER

ENTRANCE
INTO
OCCUPATIONS

A SIGNIFICANT DEVELOPMENT IN EDUCATION IS THE GROWING POPULARITY OF EVENING CLASSES FOR ADULTS. A WIDE VARIETY OF SUBJECTS IS OFFERED AND THE FEES CHARGED ARE PURELY NOMINAL. CLASSES ARE USUALLY HELD IN INSTITUTIONS OF SECONDARY EDUCATION.

(1) Excluding payments by the Province to boards for services rendered such as \$330,514 in 1949 and \$469,171 in 1950 for the education of pupils from certain unorganized areas and \$14,070 in 1949 and \$15,619 for the use of schools for practice teaching.

(2) The Federal Government paid the Province \$275,549 in 1949, and \$1,522,261 in 1950 in connection with the grants to vocational schools. This latter sum includes two amounts of \$589,000, being the annual payments for two years.

(3) Included in general legislative grant.

NOTE: Where used in the above table "n.a." means "not applicable."

III—APPROXIMATE AMOUNT SPENT IN 1950 PER PUPIL OF AVERAGE DAILY ATTENDANCE ON THE VARIOUS FACTORS OF CURRENT OPERATIONS

DEFINITION OF FACTORS:

Instruction

—Actual payments made for salaries of principals and all other teachers (regular, supply, special, including Inspectors, Superintendents and Directors employed by the Board).
Instructional Supplies—Supplies, but not equipment, used as an aid in teaching and learning. This includes teachers' supplies, pupils' supplies, text books, library books, films and rental of films, maps, supplies for music, manual training, home economics, agriculture.

Administration

—The business expenses of the board and the secretary-treasurer. This includes salary, office supplies and other expenses of the secretary-treasurer, attendance officer and clerical staff; audit fees, legal fees, postage, advertising, telephone, bank charges on checks, stamps on checks; expenses on account of the O.E.A., liability insurance, upkeep of the administration building.

Plant Operation

—The keeping of the school building open and ready for use. It includes the salary, expenses and supplies of the caretaker; fuel, water, electricity, rent, etc.

Plant Maintenance

—The keeping of the grounds, buildings, furnishings and equipment in a state of good repair. This includes repairs and minor alterations, repainting, redecorating, insurance, care of portable buildings and temporary classrooms.

Auxiliary Services

—Activities not directly a part of the main business of instruction yet closely connected with the school. This includes recreational supplies, expenses of school rink, school fair or picnic expenses; prizes or scholarships when paid for by the board; codel corps expenses; transportation of pupils other than to school; disbursements for hot lunches cafeteria, etc.

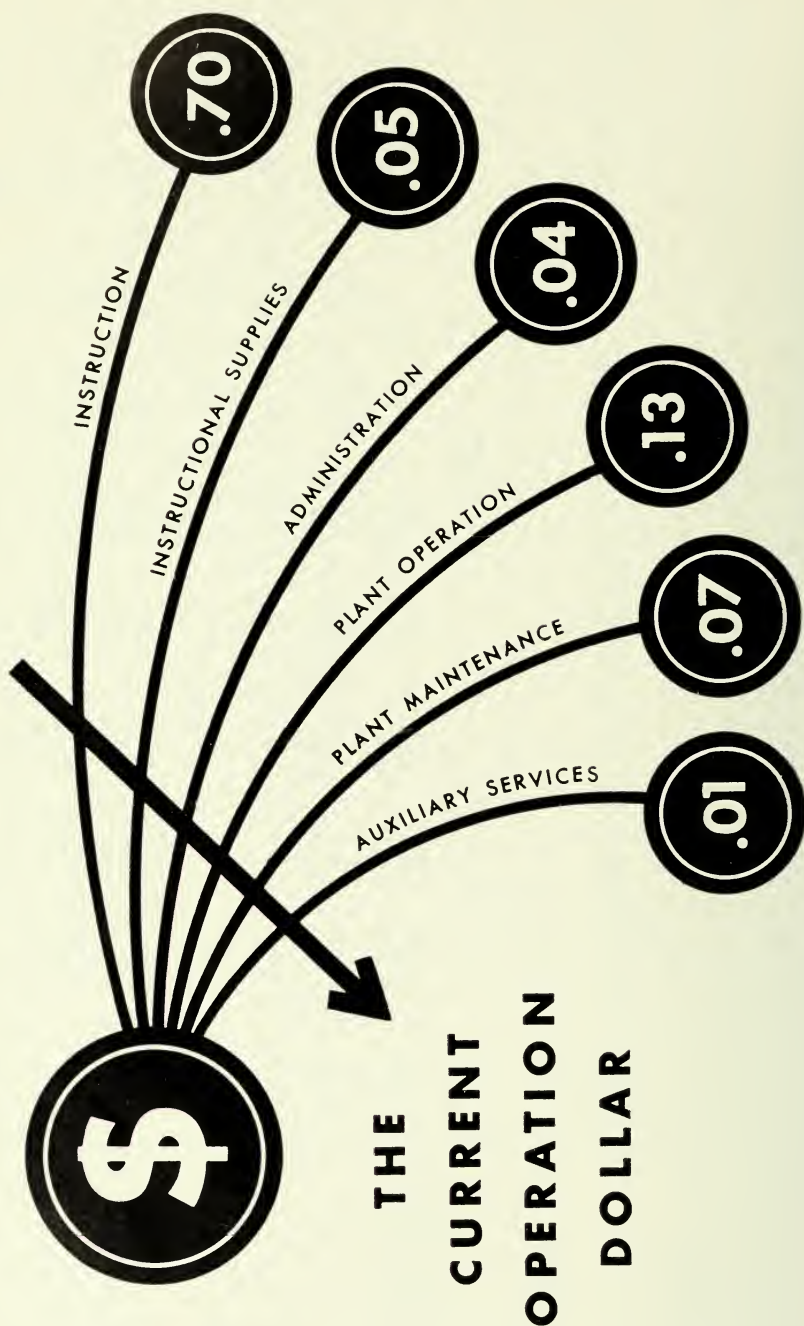

Wages of Non-Teaching Employees

—Administrative and maintenance staff.

POST-WAR SCHOOL BUILDING CONSTRUCTION

The effectiveness of the school building programme in Ontario is indicated below in school terms. New pupil places provided by the construction of new schools and additions for each year from 1945 to 1950. The total for six years is 90,300 pupil places in elementary and 20,300 in secondary schools. This includes replacements and additional accommodation.

(a)—A comparatively small sum since 1944, and thereafter included with local levies.

(b)—Includes debenture levy, also township grant.

(c)—Included in current operations previous to year shown as a special disbursement.

(d)—Figure covers transportation to elementary schools only.

(e)—Unmatured debenture principal, and capital loans.

(f)—Data not available.

Cost covers current operations, capital charges, capital outlays from current funds, and transportation.

This Table excludes the 5 Senior Auxiliary Schools. The cost per pupil of average daily attendance in these was \$522.98. If these 5 schools are included with Vocational above, the following revisions in the year figures appear:

A.D.A. Vocational and Senior Auxiliary.....	27,118
Cost per pupil of A.D.A.—Vocational and Senior Auxiliary.....	\$359.48
All Secondary.....	303.23
All Schools.....	167.26

POST WAR TREND IN EDUCATION COSTS PER PUPIL

- Notes: 1. Costs shown are annual costs per pupil of average daily attendance.
2. Cost covers current operations, capital charges, capital outlays from current funds and transportation.
3. High schools include collegiate institutes.
4. Transportation costs to secondary schools include those paid by elementary school boards.

A TYPICAL CLASSROOM IN THE TILLSONBURG DISTRICT HIGH SCHOOL

Courtesy "The Argus"

NORTHDALE PUBLIC SCHOOL, WOODSTOCK

Woodstock's new Northdale Public School exemplifies the modern trend in beauty, safety, light and colour. The exterior is buff brick, thus creating a striking appearance. The building is constructed on a single storey plan, with all exits on ground level. Maximum natural light, supplemented by the most modern artificial lighting, exists. Light gray walls and attractive floor designs go a long way toward cheerful, pleasant classrooms.

The school has eight classrooms, including a kindergarten. Its "gymnasium" provides stage and sports facilities. Provision has also been made for a principal's office, a teachers' room and a nurses' room. There is no basement. The cost was \$198,000.

**TABLE 3—LARGER ELEMENTARY SCHOOL UNITS OF ADMINISTRATION
as of Jan. 1, 1951**

A—TOWNSHIP SCHOOL AREAS BY INSPECTORATES

See Circular Elementary 15 "The Township School Area in Ontario" for details as to sections involved, administration, organization and benefits. There are now 536 Township School Areas in the Province. The organization of these came as a result of the union of 3,469 school sections (60.35% of the school sections of the Province). In 1950, 22 Township School Areas were organized, uniting 142 school sections. The growth of this movement by years is shown below:

SUMMARY		
	Township School Areas	No. of School Sections
No. formed before 1938.....	15	84
No. formed in 1938.....	15	70

COMMONWEALTH PUBLIC SCHOOL, BROCKVILLE

Courtesy Drever and Smith, Architects

Brockville's new Public School, the Commonwealth, is a beautiful modern, two-storey building, with 15 regular classrooms and two kindergartens. It accommodates 600 pupils, which is approximately half the town's enrolment. It contains a roomy auditorium, seating 400. This room also serves as a gymnasium.

Among the Commonwealth's features are four project rooms, sport dressing rooms with tiled shower rooms for boys and girls; a kitchen for the teachers; playgrounds which have ball diamonds, basketball courts and an outdoor rink, the latter for community use also.

The regular classrooms have chalk boards of green glass, designed to eliminate glare and eye-strain. Acoustic block ceilings and rubber tile floors absorb classroom clatter. Cloakrooms are air-conditioned and arranged to do away with "mad scrambles" at closing time. Combination seats and desks make seated hours a pleasure. Inkwells are designed to prevent spilling. Each room has a wash basin, and the heating and air conditioning are thermostatically controlled.

Premier Leslie Frost, K.C. officiated at the opening ceremonies.

THE PUBLIC SCHOOLS

1945 1946 1947 1948 1949 1950

TABLE 19—PUPIL TRANSPORTATION 1950-51

Approximately three and three-quarter million dollars was expended in the calendar year 1950 on transportation of pupils to and from school. Some 50,000 pupils received this service, of whom roughly 20,000 went to elementary school. One thousand vehicles were used, and over 60 per cent of these were models of 1947 to 1951. 46 per cent of these school busses had seating capacity of 36 or more.

The schedule below indicates the maximum rate per mile approved by the Department for grant purposes. However, the total approved cost per route might not exceed 50c per pupil per day except in remote areas where the maximum might be increased to the rate per pupil or per load indicated in Column 4 if adequate reason was advanced.

MAXIMUM RATES

Col. 1	Col. 2	Col. 3	Col. 4
Class	Pupil Load	Rate per Mile	Maximum Approval in Remote Areas
1	1	6c	\$.75 per pupil
2	2	8	.75 per pupil
3	3-5	12	.70 per pupil
4	6-8	16	.70 per pupil
5	9-11	18	.70 per pupil
6	12-14	20	8.50 per load
7	15-17	22	10.50 per load
8	18-20	24	12.00 per load
9	21-23	26	13.50 per load
10	24-26	28	15.00 per load
11	27-29	30	16.50 per load
12	30-32	32	18.00 per load
13	33-35	33	19.00 per load
14	36-38	34	20.00 per load
15	39-41	35	21.00 per load
16	42-44	36	22.00 per load
17	45-47	37	23.50 per load
18	48-50	38	25.00 per load
19	51-53	39	26.50 per load
20	54-56	40	28.00 per load
21	57-59	41	29.50 per load
22	60 & over	42	30.00 per load

(1) Where more than one board is concerned in the contract, the apportionment of the cost and of the pupils among the boards concerned must be indicated on the contract; and where more than one vehicle is used to fulfil the contract, the number of pupils and the mileage for each vehicle must be also indicated.

(2) The schedule is not to apply in the case of transportation of elementary school pupils from a school which is closed where the Inspector has authority to approve expenditures for transportation without reference to the Department.

(3) Where transportation is provided by public carrier and fares are paid, the actual cost of tickets purchased for approved transportation shall be eligible for grant, and the application form should indicate the number of pupils being transported and the total amount of the fares. However, in no case will rates higher than those indicated in Paragraph 2 be approved for grant.

(4) In the case of busses owned by boards, the amount eligible for grants shall be,—

(a) the lesser of the amount expended on approved transportation (excluding capital charges and capital outlays for current funds) or an amount based on a rate of twenty cents per mile; and

(b) expenditures on the purchase of busses up to the lesser of the actual cost, or, \$150, multiplied by the seating capacity of the bus, subject to the condition that tenders stating the specifications of the vehicle(s) have been called for; and that approval of the expenditure has been given.

(5) All motor vehicles used for the transportation of pupils shall meet the requirements of The Public Vehicles Act and the Regulations with respect to licence and insurance.

TILLSONBURG DISTRICT HIGH SCHOOL

This beautiful, modern school, designed to serve the educational needs of 600 pupils, half of whom come from rural homes, has 19 instruction rooms. Among its features are a Board room, a Guidance Office, an Agriculture room, two Shopwork rooms, a Commercial room, Art and Music rooms, and a gymnasium with seating capacity for 1,000. It has a campus of 14 1/2 acres. A quarter-mile cinder track encloses the football field. The cost was \$575,000.

ACADEMIC SECONDARY SCHOOLS

(Collegiate Institutes, High Schools and Continuation Schools)

TABLE 24—ENROLMENT, ATTENDANCE, GRADE, RESIDENCE, 1949-50

Note 1. All cities except Ottawa (Fisher Park H.S.), Sudbury and Welland have Collegiate Institutes. Collegiate Institutes located elsewhere are indicated thus †
Note 2. Continuation Schools are listed at the end of each County or District and are indicated thus *
Note 3. The schools of a larger high school district are indented.

H. M. Matthews

Executive Assistants

G. L. Duffin, B.A., M.Ed.
J. F. Uffen

Address of above Officials—Parliament Buildings Toronto.

Terminology

Assessment—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

Attendance Efficiency—The percentage relationship of the actual days attended to the perfect aggregate.

Auxiliary Classes—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

Capital Charges—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

Compulsory School Age—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part-time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

Consolidated School—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyances.

Correspondence Courses—Are a substitute for regular school for those who are unable to attend because of age, health or distance. They cover Grades I to XIII in English and Grades I to VIII Bilingual and are based on the new Course of Studies. A year's active enrolment is over sixteen hundred. Lessons are marked by a Departmental staff. These courses are entirely free.

Cost per Pupil-Day—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

County Pupil—A secondary school pupil living within the County but outside any secondary school district.

District—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing.

Enrolment (Net)—The number of pupils who have attended school during the year, excluding all duplications.

Fifth Classes—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

Free School Age—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

General Maintenance—Ordinary, current expense, as opposed to capital outlays and debenture charges.

Improvement District—Shall be deemed to be for all purposes of every Act a township municipality, a village municipality, or a town municipality, as may be designated from time to time by the Municipal Board.

Inspectorate—The area under the supervision of a local Departmental representative.

Kindergarten-Primary—A class combining the work of the kindergarten and Grade I.

Non-Resident Pupil—A secondary school pupil who is neither a resident nor a County pupil.

Public School Section—A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

Resident Pupil—A secondary school pupil living within the secondary school district.

School—Provincially controlled schools may be classified as:

I. Elementary—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. Secondary—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

- 1. **Technical High Schools.**
- 2. **Commercial High Schools.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

III. Provincial Technical Institutes

These offer courses designed to train technicians for positions in industry which are supplementary to, but not in the field of, professional engineering. The admission requirement is secondary school graduation, and the courses are of two or three years' duration. The institutes are owned and administered directly by the Department of Education under the Vocational Education Act, Part II, but close co-operation with industry is maintained through advisory committees, the members of which are appointed by the Minister.

IV. Professional Training Schools

- (a) Ontario College of Education (University of Toronto)—for the training of secondary school teachers.
- (b) Provincial Normal Schools—for the training of elementary school teachers.

V. Special Schools:

- Ontario School for the Blind, Brantford.
- Ontario School for the Deaf, Belleville.

School Car—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of northern Ontario. There are six of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, and each car is "spotted" for about a week at a time. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. The present enrolment approximates 150, and comprises 10 nationalities. The Department pays all operating costs.

School Year—The school year consists of two terms, September 1 to December 22, and January 3 to June 29. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remain on the calendar year basis.

Secondary School District—The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

Township School Area—A unit of school administration comprising two or more contiguous rural school sections in the same township or in adjacent townships, or comprising such rural sections along with one or more adjacent villages or towns. See Cir. Elem. 15, "The Township School Area in Ontario."
